Radiopharmaceutical Tc99m Kit Supply Update

Dear Customers,

As stated in our last communication on November 17th 2021, Sun Radiopharma is experiencing a supply interruption for several radiopharmaceutical products. We understand how disruptive this has been for you, and we are committed to resuming supply as quickly as possible.

In order to successfully re-enter the market, our current strategy is to continuously manufacture one product at a time until sufficient inventory is obtained. This will help avoid future stock-outs. Products are prioritized in order of market criticality.

The most critical product, Sulfur Colloid, re-entered the market on January 11, 2022. The next anticipated lot release date is noted below. Lots will continue to be released over the next few months.

The dates of the Product Release Schedule below are “best estimates” and are subject to change.

Product Release Schedule

1. Sulfur Colloid: February 18, 2022
2. Mebrofenin: April 15, 2022
3. Mertiatide: April 21, 2022
4. Pyrophosphate: May 9, 2022
5. Sestamibi: June 14, 2022
6. Medronate: June 30, 2022

Once again, we sincerely apologize for the supply interruption and the delay of some products returning to market. Thank you for your continued understanding. We are committed to re-gaining your confidence and providing you with world-class service. We will continue to keep you informed as we work to resume supply of these critical products.

Sincerely,

Anand Shah
AVP, Head of Generics Rx and Institutional
