WHAT DO THEY SAY

"I enjoyed the opportunity to see what other people are doing. **It sparked new ideas, validated existing ones, and resulted in serendipitous connections.**" Chief Data Scientist, Talla

"The event was excellent" Research Engineer, Facebook

"Great value for me both personally and professionally - two days where **I could learn, network and understand current and potential future trends** and how best I can add value to healthcare client companies. I have attended a number of life sciences centric symposium /conferences over the years and always found them to be beneficial. However in my view, **the size and format of this summit sets you apart, well done and keep up the great work.**" Director, ML Associates

"It was a fantastic experience. The networking time was well-organized and all the speakers and guests played their role perfectly. Actually everything was perfectly organized. **It was one of the best events I've ever attended.**" Anon

"I think that DL in healthcare summit has **been the best summit I have ever attended.** Not only because of the great food and the beautiful space, but because of the speakers and the science, that looked like magic available to all hands. It is a MUST if you want to know what is going to happen in the deep learning field." CEO, MedicSen

"Great connections, business opportunities & learning about new trends. Congratulations on another amazing event!" Founder, Eyeris

"We really like Re-Work conferences as they **bring together machine intelligence experts from many industries and focus on applications and benefits of various approaches.** We managed to meet both **research and industry partners.** At Insilico, we are trying to encourage women in science, especially young female scientists. This makes events run by all-female Re-Work team special for us. **I highly recommend anyone interested in practical applications of AI to attend their events.**" CEO, Insilico Medicine
