

Readorium data dictionary:

District level reports

View by School	Administrators view data across all of the schools in the district or click into each individual school
Students Currently Online	The number of students accessing Readorium in real time
% Active Students	The percent of students that are active with respect to the total number of students that are registered to use the program depicted as a donut chart
Daily Usage	A bar graph that shows the number of students using Readorium over a 7 day, 30 day, or entire school year time period
Proficiency	The grade for each reading (science) content discipline and comprehension strategy as an average across the district, schools, classes, or students.
View by Teachers	Administrators can choose to view student progress data by teacher name within a specific school
View by Classes	Administrators can choose to view student progress data by class
View Detailed Report	Administrators can choose to view student progress on the individual student level

Teacher Level Reports

Module	Defines the library that the class is using as either Readorium Rising Reader (Grades 3-5) or Readorium Scholar (Grades 6-8)
Report Tutorial	Video description of student progress reports and how to read them
Class name	General identifier of class usually provided by the teacher
ID	Readorium defined number used to identify a particular class
Student Feedback	Teachers can download and read student reflection sheets which contain information on what they learned in each book and the strategies they used
Student reflection	Written statement by students about their reading experience (what they learned and how they used the strategies taught) after completing each book
Select Report	Allows teachers to view reports based on content standard (scientific discipline) or reading strategy. Teachers may also select class summary reports.
Download	Allows teachers to download Excel sheet of report being viewed
Print	Allows teachers to print Excel sheet of report being viewed
Search	Allows teachers to search by student name or any identifiable data

Class Summary Report

Name	Student name as identified on roster completed by teacher
Books	The number of books completed to date out of 40 possible books
Strategy Lessons	The number of strategies completed to date out of 40 possible lessons
Time Spent Today	Recorded in hours:minutes for the present day for each student
Time Spent Past Week	Recorded in hours:minutes for the past week for each student
Time Spent Overall	Recorded in hours:minutes since implementation start date for each student
Initial RL	Reading level in grade level equivalency after having completed the first book
Current RL	Reading level in grade level equivalency for the present chapter

Class Proficiency in Strategies

# of Active Students	The number of students who have completed any book or books in a given strategy
>=80%	Students receiving a score greater or equal to 80% based on the number and types of hints required to answer the higher-level reading comprehension questions. These students are defined as proficient.
<80%	Students receiving a score of less than 80% based on the number and types of hints required to answer the higher-level thinking, reading comprehension questions. These students are considered a focus group for greater individualized instruction to hone the skills needed to use a particular strategy proficiently.

Clicking on any given bar within the Class Proficiency in Strategy Report will show another graph to explain the data down to the student level.

Class Proficiency in ...	Identifies the reading comprehension strategy that is covered within the chart
Name	Student name as identified by the roster completed by the teacher
Proficiency (Bar)	A bar graph representation of the proficiency (grade)
Proficiency (Grade)	A numerical percentage, defined by the number and types of hints required by the student, to answer the higher-level reading comprehension questions within all of the books that cover that specific strategy.
Completed Chapters	The number of chapters completed in each book. Each book within Rising Reader contains 5 chapters. Each book within Scholar contains 7 chapters.

Clicking on any student name within the Class Proficiency in... will show another graph depicting the information with regard to the specific student by book

Name	Title of book completed
Proficiency (Bar)	A bar graph representation of the student's reading proficiency for that specific book
Proficiency (Grade)	A numerical percentage defined by the number and types of hints required by the student to answer the higher-level reading comprehension questions within that book.

Class Proficiency in Content Standards

# of Active Students	# of students who have completed any book within a specific scientific discipline
>=80%	Students receiving a score greater or equal to 80% based on the number and types of hints required to answer the higher-level thinking, reading comprehension questions. These students are defined as proficient.
<80%	Students receiving a score of less than 80% based on the number and types of hints required to answer the higher-level reading comprehension questions. These students are considered a focus group for greater individualized instruction to hone the skills needed to use a particular strategy proficiently.

Clicking on any given bar within the Class Proficiency in Content Standard Report will show another graph to explain the data down to the student level.

Class Proficiency in ...	Identifies the scientific content standard that is covered within the chart
Name	Student name as identified by the roster completed by the teacher
Proficiency (Bar)	A bar graph representation of the student's reading proficiency by content standard or science discipline
Proficiency (Grade)	A numerical percentage defined by the number and types of hints required by the student to answer the higher-level reading comprehension questions within all of the books that cover that specific standard.
Completed Chapters	The number of chapters completed within each book. Each book within Rising Reader contains 5 chapters. Each book within Scholar contains 7 chapters.

Clicking on any student name within the Class Proficiency in... will show another graph depicting the information with regard to the specific student by book

Name	Title of book completed
Proficiency (Bar)	A bar graph representation of the student's proficiency for that specific book
Proficiency (Grade)	A numerical percentage defined by the number and types of hints required by the student to answer the higher-level thinking, reading comprehension questions within that book.
