  - 3. 3 heavy duty utility shelving for supplies storage.
  - 4. 4 Stainless steel tables
  - 5. All food and paper supplies unsold/unused.

Renovations

I completely renovated the trailer.

In October 25, I had new exterior stainless steel paneling installed, as well as insulation, and a new roof.

In January and February 26, the interior was redone. New stainless steel ceiling and walls, new aluminum no-slip floor, as well as insulation beneath the floor, walls, and ceiling. New led lightning, and several new light switches and outlets. Installation of a mini split, a new water heater, and a new stainless steel 3-tier sink. And finally, a new weatherproof door and seal, and new steps.
