Houston - Online Hotel, Resort & Accommodation Booking WooCommerce Theme

Welcome to Houston - Online Hotel, Resort & Accommodation Booking WooCommerce Theme.

Thanks for purchasing this awesome theme with smooth and outstanding *Hotel Booking & Reservation process*.

Here we presented the usages of this theme including screen-shots for your better understanding.

For more information you can contact through our support portal [RedQ Team Support](#) or can direct mail to our support@redqteam.com

Installation of Theme & Helper-Plugin

After downloading the full packages from ThemeForest you will get an zip folder named

`Houston.zip`

Then Follow this process to install it inside your wordpress.

- 1.Goto Wp-Admin panel "Appearance > Themes"
- 2."Add new > Upload a theme"
- 3.Then Choose & Upload houston.zip file

After the installation of theme, there is a Admin-notice to install the Theme-Helper plugin and other required/recommended plugins.

The following required plugins are currently inactive: [Contact Form 7](#), [Envato Market](#), [Houston Theme Helper](#), [Reactive Pro](#), [Reactive Template Render](#), [Visual Composer](#), [WooCommerce - excelling eCommerce](#), [Woocomemrce Rental & Booking](#) and [houston Demo Importer](#). ✕

[Begin activating plugins](#) | [Dismiss this notice](#)

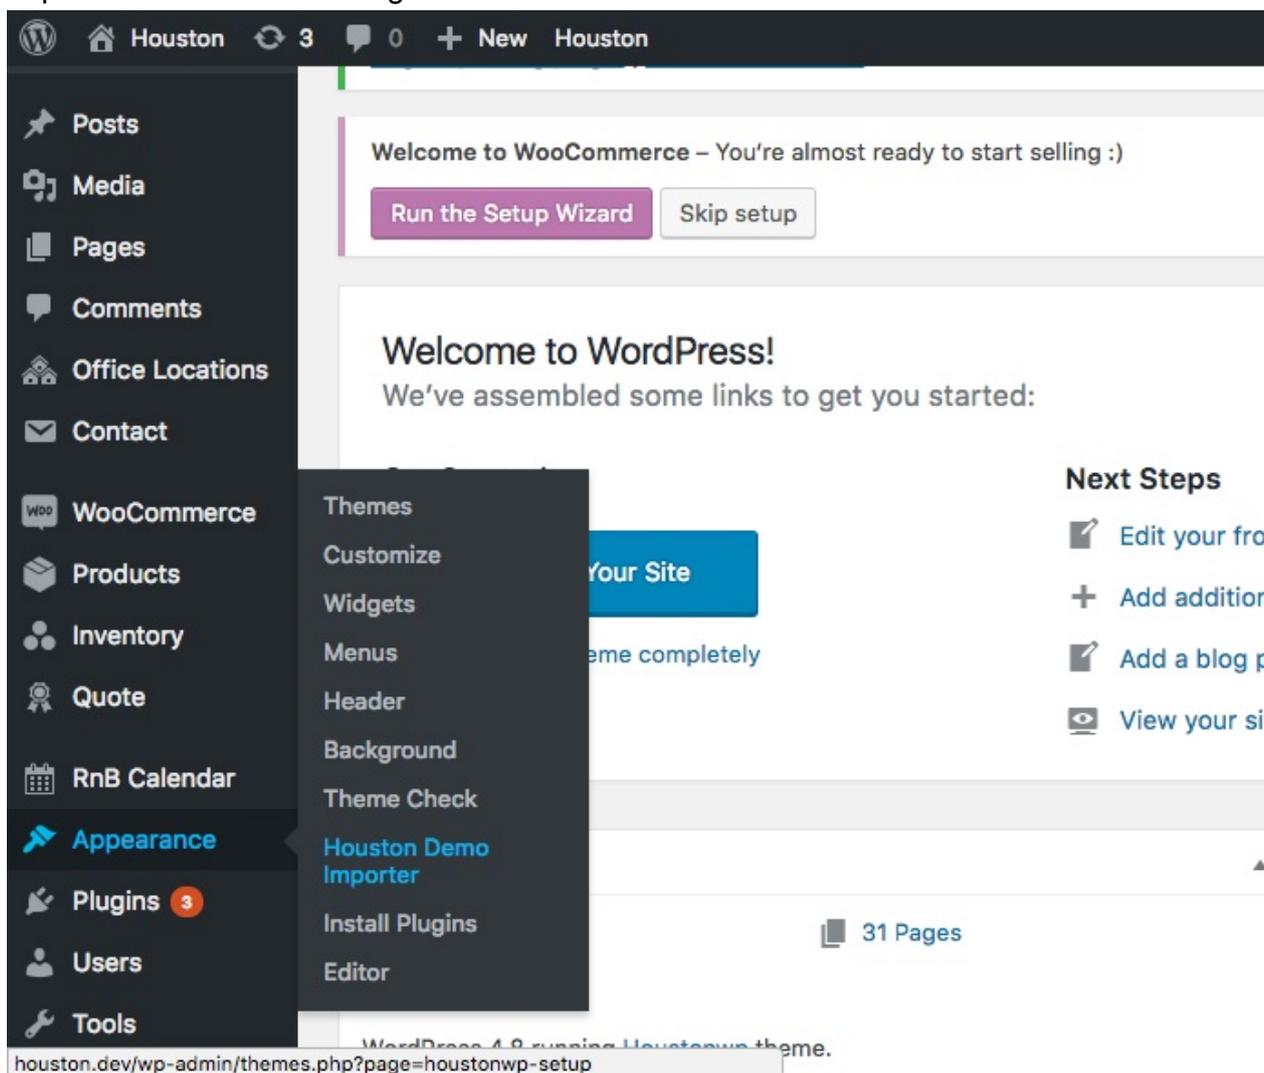

Begin installing the plugin and activate theme.

Dummy Data Importer

After installing theme and all required plugins go `Dashboard->Appearance->Houston Demo Importer` .

Check the following screen-shot.

After installing theme and all required plugins go `Dashboard->Appearance->Houston Demo Importer`. Check the following screen-shot.

When you click Houston demo importer link, it will redirect you to the dummy data importer window.

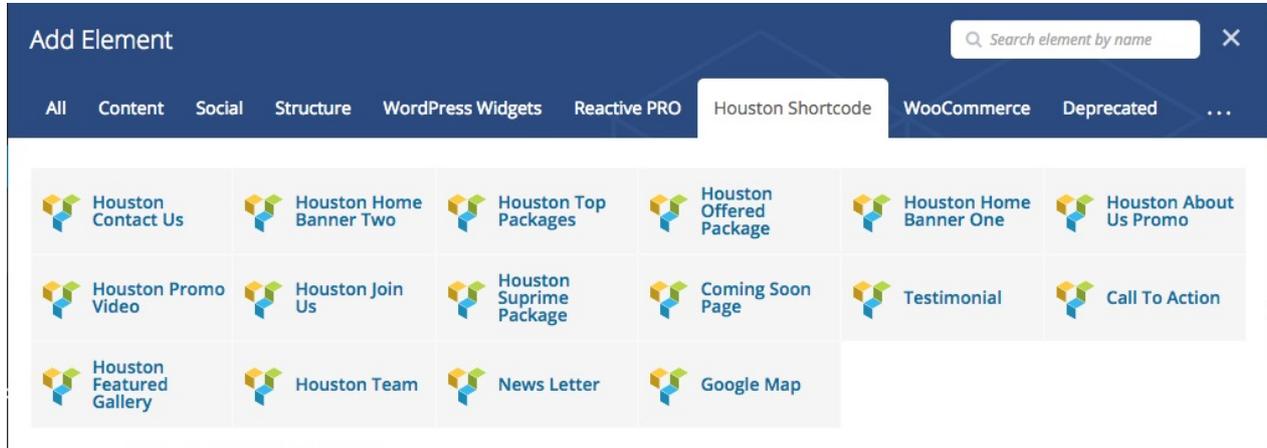

After completing all the steps properly, all the dummy data and theme setting options get imported.

Shortcodes & Templates

In this chapter we will discuss about the lists of shortcode coded with visual composer, about how to build them & what will be the output in page view. Let's move on then ...

Intro

There are plenty of short codes for you to build pages as you wish. You hold the full control.

There are some short codes which will contain elements as their child. Those are:

- Houston Offered Package
- Contact Us Page
- Testimonial
- Featured Gallery
- Houston Team
- Houston Supreme Package and much more...

Houston Page Banner

Houston page banner comes from two plugins.

- LayerSlider
- Reactive Pro.

Let's discuss how we can build page banner using those plugins.

Step 01 : Make a slider with all the necessary informations Using Layerslider plugin.

Step 02 : Create a search banner using reactive pro plugin.

- At first create a reactive builder data from WP_Admin > Reactive Builders
- After publishing the reactive builder data it will generate a shortcode.

Step 03 Then Go to the page you wanted to create and select the `Houston Home Banner one` shortcode. Then choose the Reactive Builder you just created for home banner search panel. Also set the layer slider shorcode ID.

Blog Settings

In Blog page settings it consists of options about the view layer of Blogs.

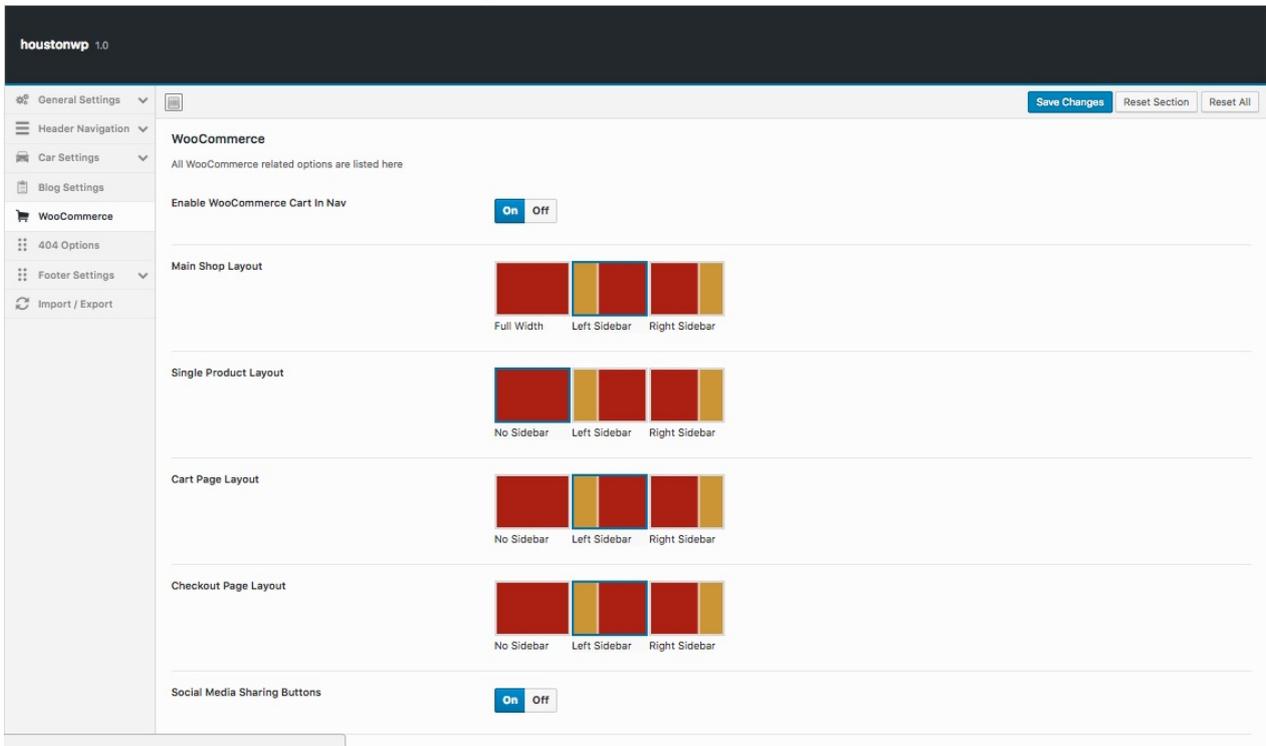

Settings Background:

WooCommerce Settings

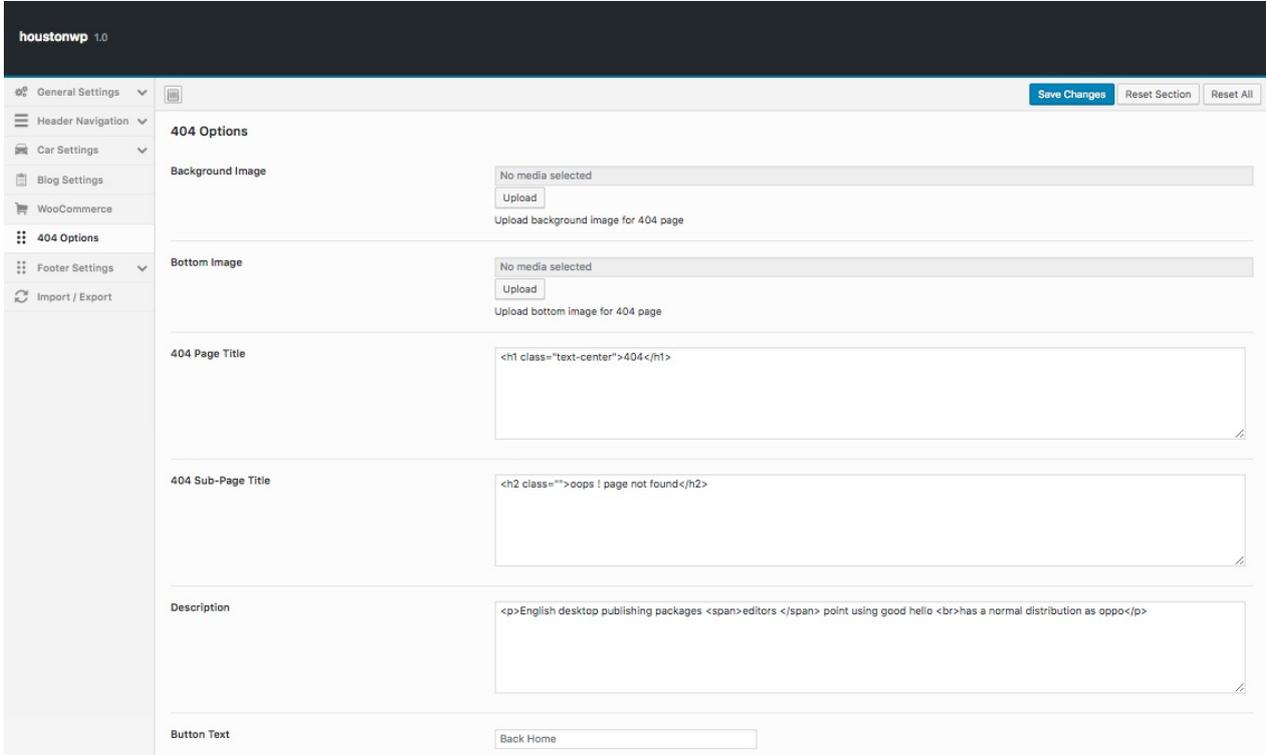

In woocommerce settings site admin has access to choose the options about woocommerce related view & data on front end layer.

e.g. Main layout, shop layout, cart layout, social media sharing, related product settings, Upsell and Crosssell product settings etc.

404 settings

Houston theme options give accesibility to make own 404 page view.

Footer settings

Footer settings consists of two sections.

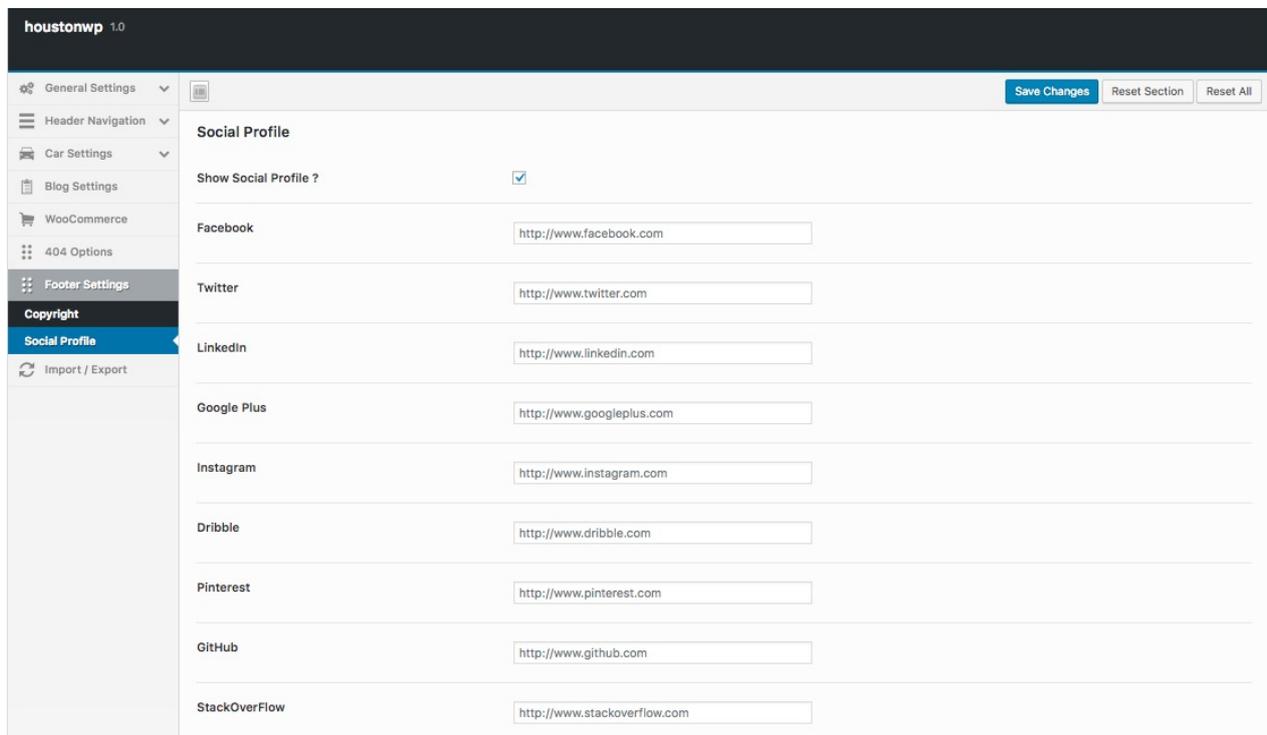

- Copyright
- Social profile

Copyright section:

In copyright section, it has the information text fields to insert data/info into footer section.

Social Profile section:

In social profile section admin has access to connect all his/her social media/profile connection.(e.g. facebook, twitter, linkedin, google plus, rss, stackoverflow, dribble, github etc...)

The screenshot displays the 'Social Profile' settings page in the HoustonWP 1.0 admin interface. The left sidebar contains a menu with options like 'General Settings', 'Header Navigation', 'Car Settings', 'Blog Settings', 'WooCommerce', '404 Options', 'Footer Settings', 'Copyright', 'Social Profile', and 'Import / Export'. The 'Social Profile' section is active, showing a 'Show Social Profile?' checkbox which is checked. Below this, there are input fields for various social media profiles, each with a pre-filled URL:

Social Media Profile	URL
Facebook	http://www.facebook.com
Twitter	http://www.twitter.com
LinkedIn	http://www.linkedin.com
Google Plus	http://www.googleplus.com
Instagram	http://www.instagram.com
Dribble	http://www.dribble.com
Pinterest	http://www.pinterest.com
GitHub	http://www.github.com
StackOverFlow	http://www.stackoverflow.com

At the top right of the settings area, there are buttons for 'Save Changes', 'Reset Section', and 'Reset All'.
