Turbo - Car Rental Wordpress Theme

Turbo is a Car Rental wordpress theme designed with Grid-Based Approach. It serves the aspiration of a modern and creative design and functionality.

[BUY NOW](#) / [VIEW DEMO](#)

Author Information

Theme Name: Turbo - Car Rental WordPress Theme

Theme URI: <http://bit.ly/2eKJEJb>

Author: RedQ Team

Author URI: RedQTeam.com

Version: 1.0

License: GNU General Public License v2 or later

License URI: [License](#)

Getting Started

Welcome to installation process...

After downloading the theme package from themeforest extract the package folder and there is the zip package of the theme.

turbowp.zip

Follow the steps to install the theme.

1. Goto Wp-Admin panel "Appearance > Themes"
2. "Add new > Upload a theme"
3. Then Choose & Upload turbowp zip file

Instalstlation Theme Helper and other Plugins

After install & activate the theme there is options to installed the required plugins needed for the theme.

Please check this admin notice on WP-Admin panel after installing the theme.

This theme requires the following plugin: *UserPlace*.

The following required plugins are currently inactive: [Contact Form 7](#), [Turbowp Helper](#), [WooCommerce - excelling eCommerce](#), [Woocomemrce Rental & Bookings](#) and [widget-importer-exporter](#).

[Begin installing plugin](#) | [Begin activating plugins](#) | [Dismiss this notice](#)

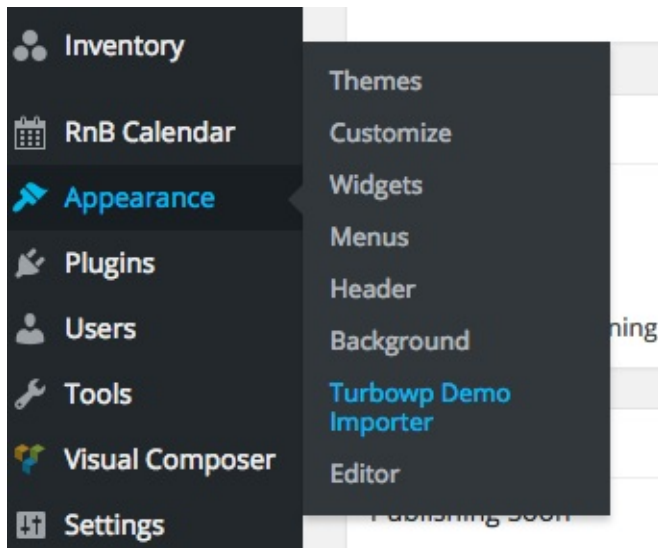

Begin installing the plugin and activate them.

Dummy Data Importer

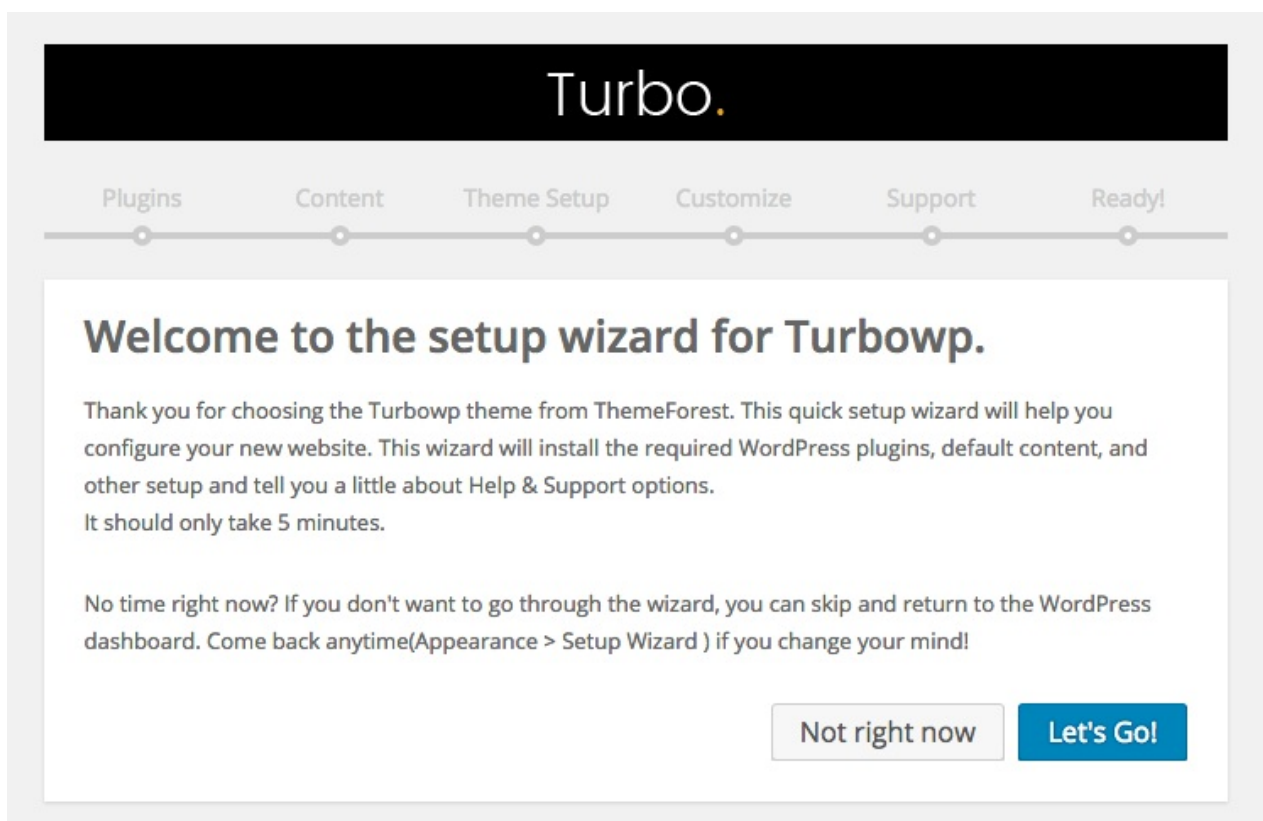

After installing theme and all required plugins go [Dashboard->Appearance->Turbo Demo Importer](#) .

Check our demo installation video also from youtube : <https://youtu.be/YyHpmhaca20>

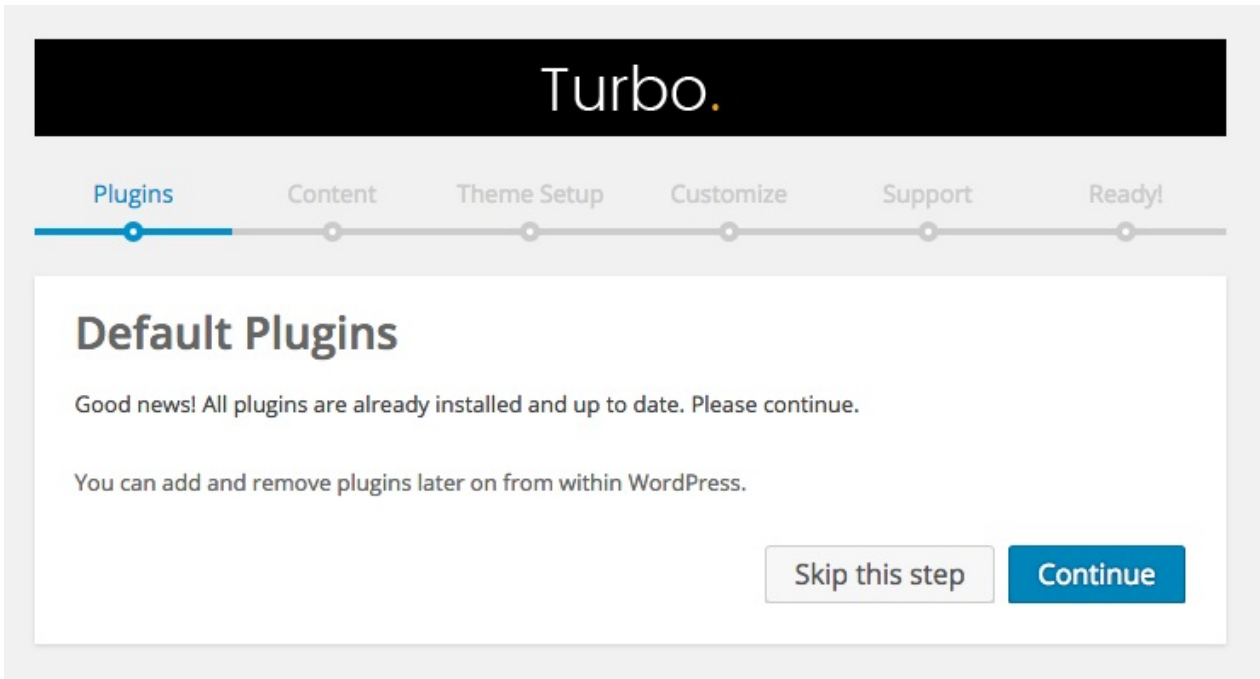

Check the following screen-shot.

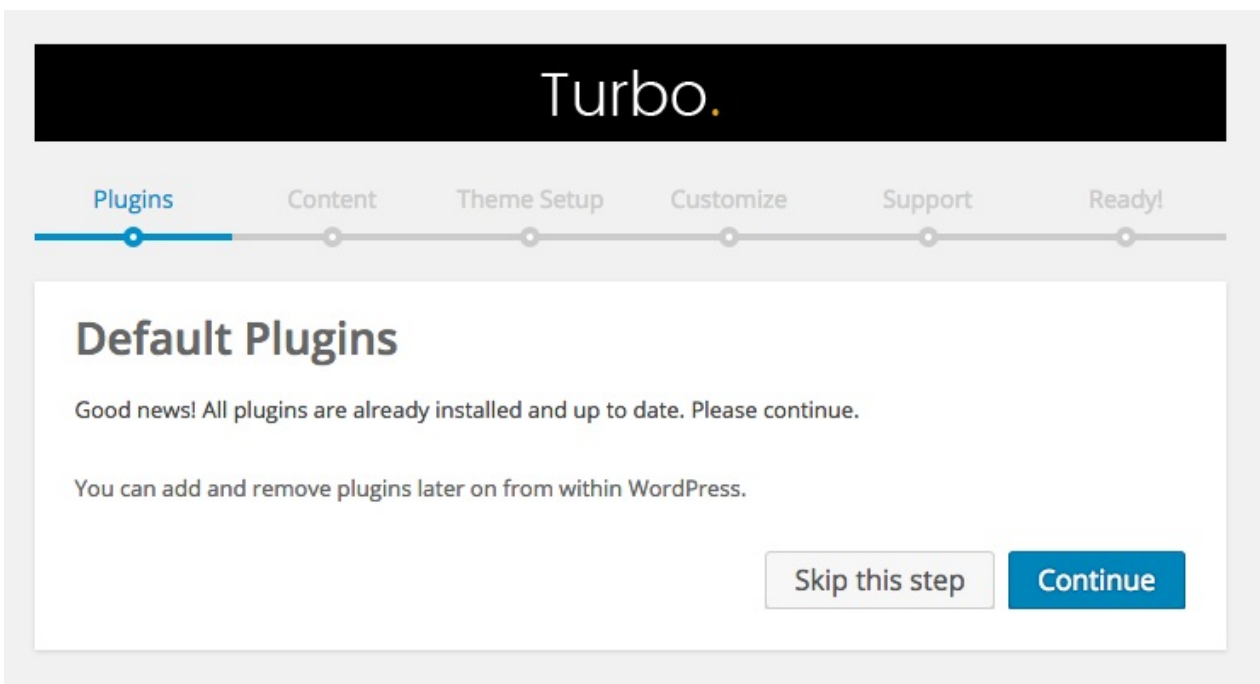

When you click Turbo demo importer link, it will redirect you to the dummy data importer window that is look like the following image.

Now start your installation process by clicking the let's go button.

Now complete the full installation by clicking continue button.

It may takes few mins to finish this content setup part.

Theme Customization

Most changes to the website can be made through the Themeoptions from the WordPress dashboard. These include:

Look: Upload a new logo, change styles, colors etc.

Layout: Enable/Disable/Change Layouts for header/footer etc.

Components: Control components of headers/footers like copyright info on footer etc.

Other Misc settings like social icons, email address etc.

To change the Sidebars go to Appearance > Widgets. Here widgets can be "drag & dropped" into sidebars.

Advanced Users: If you are going to make changes to the theme source code please use a [Child Theme](#) rather than modifying the main theme HTML/CSS/PHP code. This allows the parent theme to receive updates without overwriting your source code changes.

A blank child theme is supplied with main download and can be found in /resource folder of Main themeforest download zip.

Plugins Content Theme Setup Customize Support Ready!

Help and Support

This theme comes with 6 months item support from purchase date (with the option to extend this period). This license allows you to use this theme on a single website. Please purchase an additional license to use this theme on another website.

Item Support can be accessed from <https://redqsupport.ticksy.com/> and includes:

- Availability of the author to answer questions
- Answering technical questions about item features
- Assistance with reported bugs and issues
- Help with bundled 3rd party plugins

Item Support **DOES NOT** Include:

- Customization services (this is available as [paid gig](#))
- Installation & Setup services (this is available as [paid gig](#))
- Help and Support for non-bundled 3rd party plugins (i.e. plugins you install yourself later on)

More details about item support can be found in the ThemeForest [Item Support Polity](#).

[Agree and Continue](#)

Now click view your new website button to see your website.

[Return to the WordPress Dashboard](#)

There are one more step to finish importing dummy data completely.

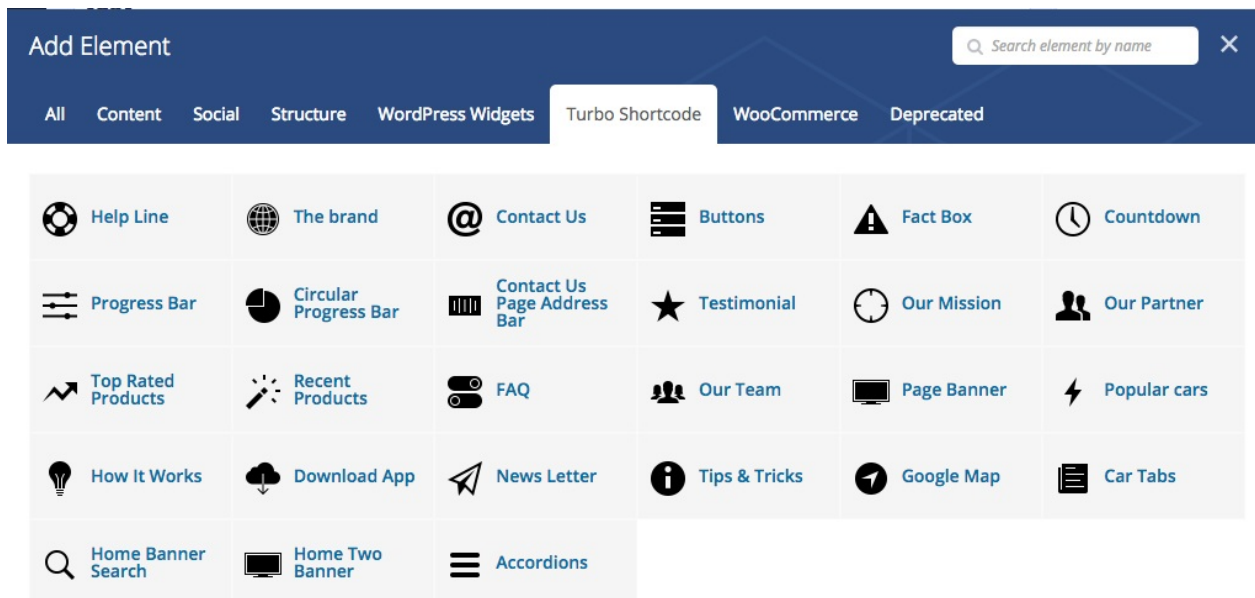

Now, from admin panel go to Dashboard->Woocommerce->Setting then click the save change button.

The screenshot shows the WooCommerce settings interface. On the left is a dark sidebar menu with options like Dashboard, Posts, Media, Pages, Comments, Contact, WooCommerce (highlighted), Orders, Coupons, Reports, Settings, System Status, Add-ons, Products, Inventory, RnB Calendar, Appearance, Plugins, Users, Tools, Visual Composer, Settings, and Turbopw Options. The main content area has tabs for General, Products, Shipping, Checkout, Accounts, Emails, API, and RnB Settings. The 'General' tab is active, displaying 'General Options' and 'Currency Options'. Under 'General Options', there are dropdown menus for Base Location (United Kingdom (UK)), Selling Location(s) (Sell to All Countries), Shipping Location(s) (Ship to all countries you sell to), and Default Customer Location (Geolocate). There are also checkboxes for 'Enable Taxes' and 'Store Notice', both currently unchecked. The 'Currency Options' section includes a note: 'The following options affect how prices are displayed on the frontend.' Below this are dropdown menus for Currency (Pound sterling (£)), Currency Position (Left (£99.99)), and input fields for Thousand Separator (,), Decimal Separator (.), and Number of Decimals (2). A blue 'Save changes' button is located at the bottom of the settings area.

Now it's done.Enjoy :).

intro

There are plenty of short codes for you to build pages as you wish. You hold the full control.

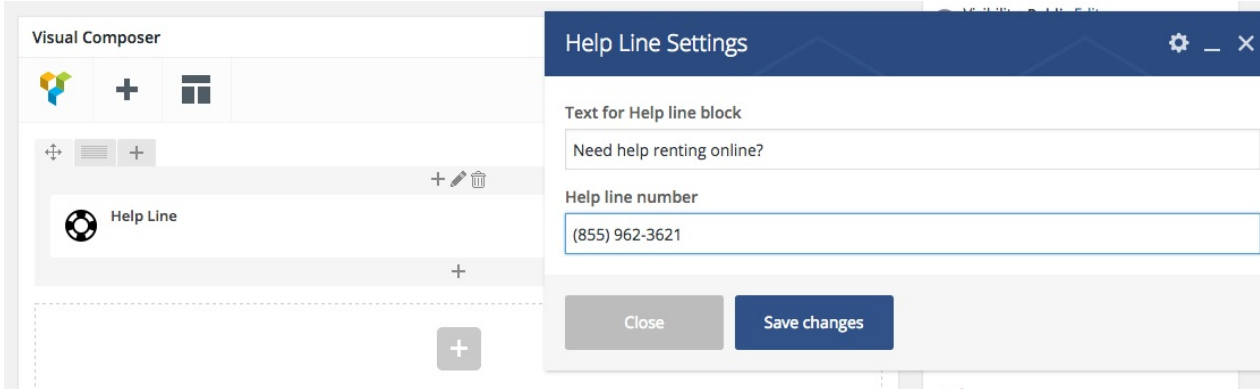

There are some short codes which will contain elements as their child. Those are:

- Accordion
- Contact Us Page Address Bar
- Testimonial
- Our Partner
- Our Team
- How It Works etc.

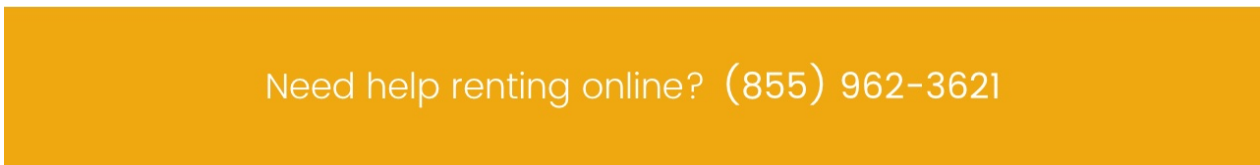

In Contact Us Page Address Bar, we have shown how to add child elements. Please follow this instruction for the short codes mentioned above.

Lorem Ipsum is simply dummy text of the printing and typesetting industry

Suspendisse ultricies scelerisque turpis, elementum ornare arcu posuere mollis. Donec vitae tempor ante, ut tempus augue. Maecenas aliquam, ante quis egestas molestie, ipsum sapien faucibus lorem, ac placerat magna purus id quam. Proin id felis sapien.

Mauris metus eros, finibus et eros eget, vehicula tincidunt ex. Integer dictum turpis felis, at gravida lectus vestibulum et. Mauris vitae massa pellentesque, rutrum lacus sit amet, dictum massa.

Contact us

Backend:

The screenshot displays the Visual Composer interface for configuring a 'Contact Us' block. On the left, the 'Visual Composer' toolbar includes a grid icon, a plus sign, and a list icon. Below it, a 'Contact Us' block is visible with an '@' icon and a plus sign for adding more blocks. On the right, the 'Contact Us Settings' panel is open, showing the following configuration:

- Title for contact us block:** Contact Us
- Address:** 1234 New Design St. Melbourne, Australia
- Email address:** hello@turbotheme.com
- Phone number:** +880 1738 567864
- Schedule:** Add Media

At the bottom of the settings panel, there are 'Close' and 'Save changes' buttons. The panel also features 'Visual' and 'Text' tabs and a settings icon in the top right corner.

Frontend:

Contact Us.

📍 1234 New Design St. Melbourne, Australia

✉️ hello@turbotheme.com

☎️ +880 1738 567864

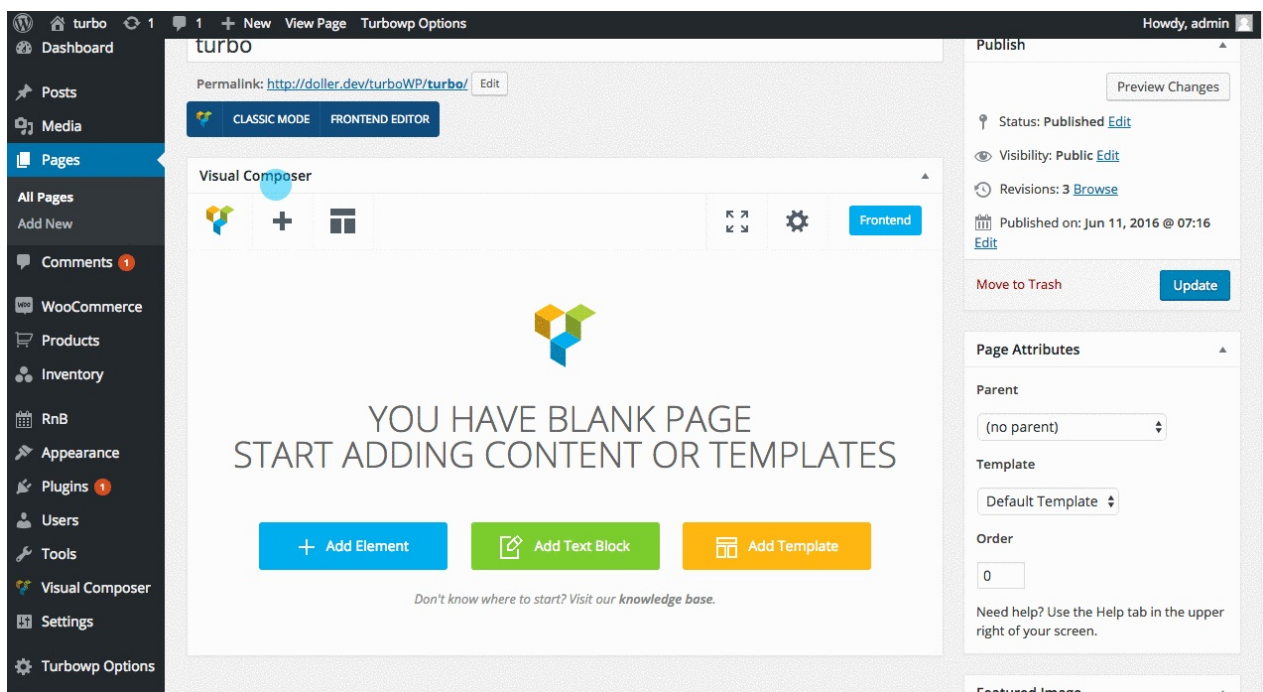

HOUR WORK: MONDAY - FRIDAY / 08AM - 05PM

Contact details

Contact details will look like this:

 Phone Phone 01: (8801) 738 5678 64 Phone 02: (8801) 722 0008 99	 Address 5th Floor, AH Building 1234 New Design St. Melbourne, Australia	 Email info@yourdomain.com support@yourdomain.com
---	---	--

To achieve this block use "Contact Us Page Address Bar" shortcode. Insert child elements. Then fill up the fields. You are ready to go. :)

Buttons

Backend:

The screenshot shows the Visual Composer interface with a 'Buttons Settings' panel open. The panel contains the following settings:

- Button text:** Large Button
- Button URL:** http://something.com
- Button Type:** Turbo Primary Button (with a dropdown arrow). Below it, the text reads: *Button types: primary, default, dashed.*
- Button Size:** Turbo Large Button (with a dropdown arrow). Below it, the text reads: *Button size: large, medium, small, mini.*
- Button Style:** Turbo Rectangular Button (with a dropdown arrow).

At the bottom of the settings panel, there are two buttons: 'Close' and 'Save changes'.

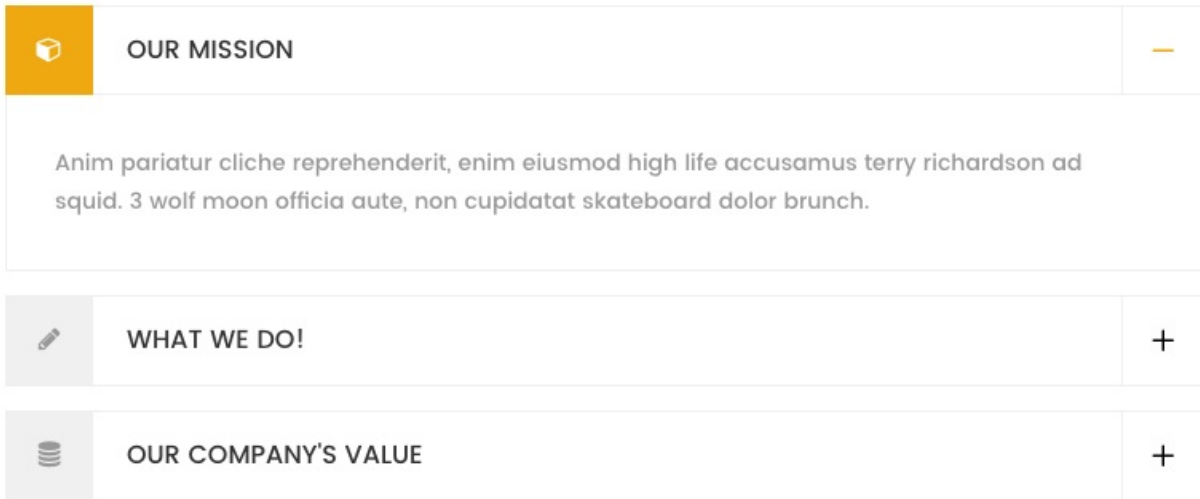

Frontend:

Accordions

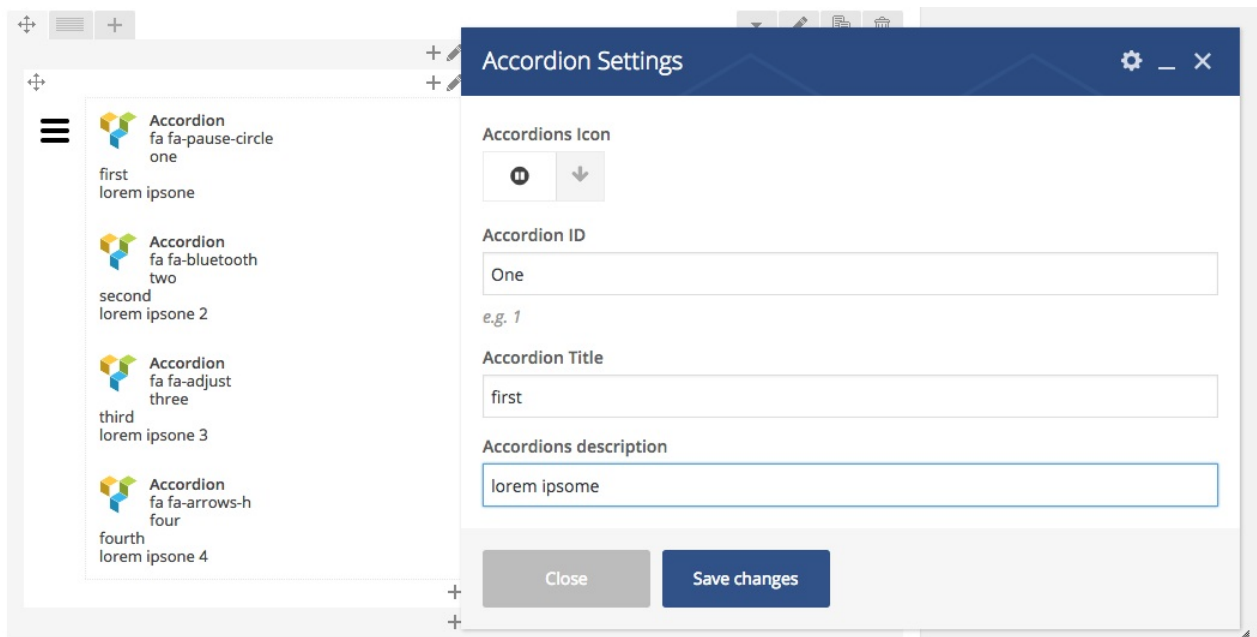

Frontend:

Accordions

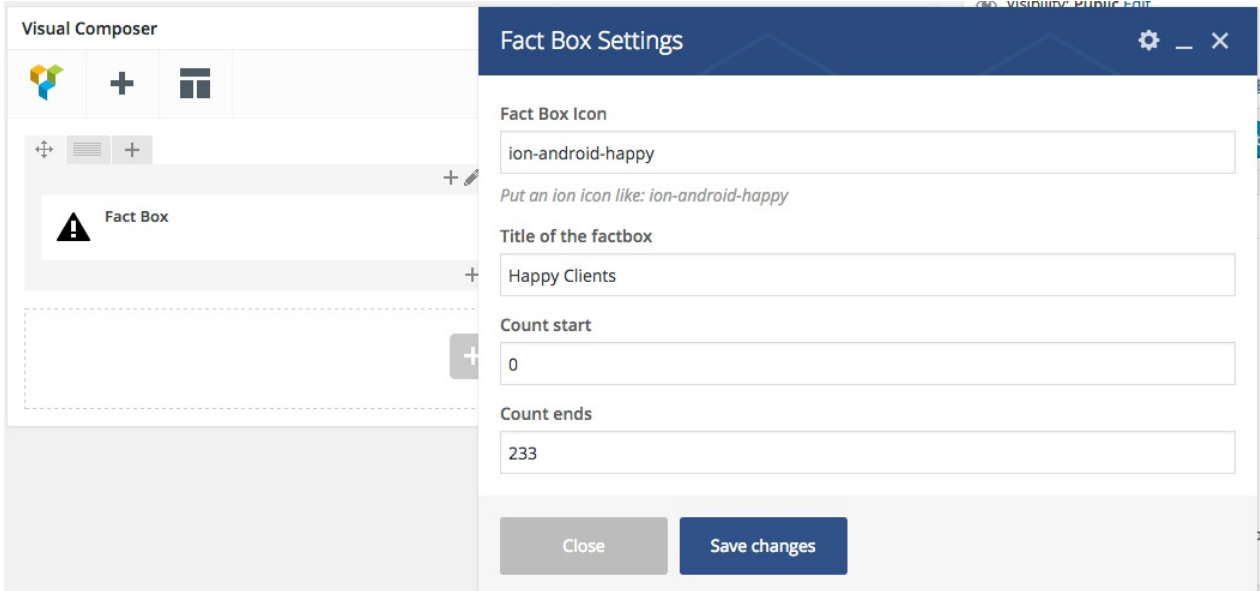

For this block, first choose 'Accordions' shortcode. Then add elements as child of this shortcode. Please note that you have to provide unique id for each accordion element.

Configure Reactive Pro (Searching & Filtering Plugin) with RnB (WooCommerce Rental & Bookings Plugin)

If you want bookings and rental products in your site then you can use our `RnB` plugin <https://codecanyon.net/item/reactive-pro-advanced-wordpress-search-filtering-grid/17425763?ref=redqteam>

When your site has bunch of rental properties then you might thinking about searching and filtering facilities for your site. In this case you can relax because we've most amazing `Searching & Filtering Plugin (Reactive Pro)` . which works perfectly with `RnB` plugin.

Please check the following configuration to work perfectly `RnB` plugin with `Reactive Pro` Plugin.

Back-end Configuration :

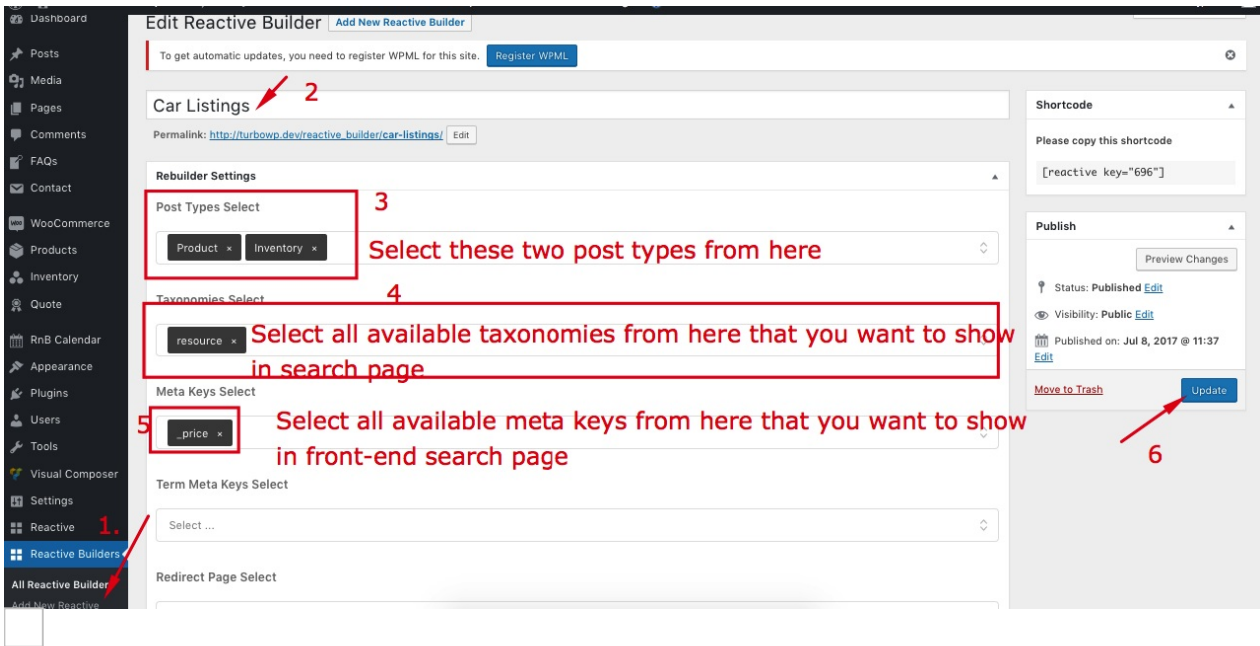

Create a builder post for rental products from Dashboard->Reactive Builder by clicking Add Reactive Builder button

Enter a title in title box

1. Select `product` and `inventory` post types from `Select post types` select box
2. Then in Taxonomy Select box you'll find all available taxonomies. From here you can choose all available taxonomies for product and inventory post types. Here is the list of all available taxonomies of inventory and product post types `rnb_categories` , `resource` , `person` , `pickup_location` , `dropoff_location` , `attributes` , `features` , `deposit` When you build your search page in front-end then you'll only these taxonomies available here.
3. Like taxonomies you'll find all available meta keys in `Meta Key Select` box.

You can also choose term meta and redirect page from here.

Please check the following screenshot:

When you click the update button you'll see a `shortcode` at top right.

Copy it and go to `Dashboard->page` directory, create a new page and paste this shortcode then click publish button and you're done with back-end settings.

Turbowp Option Framework Settings

Turbo Wordpress theme use Redux Option framework to handle a vast section. Where user can easily upload their correspondin images, social media links, custom styling etc.

In this chapter lets discuss about the `Turbowp Options` .

General Settings

This is the general settings of turbowp options .

Here user have access to add/modify custom css , custom js , google analytics

The screenshot shows a web interface for 'General Settings'. On the left is a sidebar with a menu containing: 'General Settings' (with a gear icon), 'Custom CSS/Scripts' (highlighted in blue), 'Header Navigation' (with a dropdown arrow), 'Blog Settings' (with a clipboard icon), 'Footer Settings' (with a dropdown arrow), and 'Import / Export' (with a refresh icon). The main content area is titled 'Custom CSS/Scripts' and features three buttons at the top right: 'Save Changes' (in blue), 'Reset Section', and 'Reset All'. Below the title is a section 'Move Dynamic/Custom CSS Into External Stylesheet?' with a descriptive paragraph and an unchecked checkbox. The paragraph explains that this option moves dynamic CSS from the head to an external file for better aesthetics and caching, but requires server permissions to write to the file. Below this is a 'Custom CSS Code' section with a text input area and a note: 'If you have any custom CSS you would like added to the site, please enter it here.' At the bottom is a 'Custom JS' section with a text input area and the instruction: 'Paste your JS code here.'

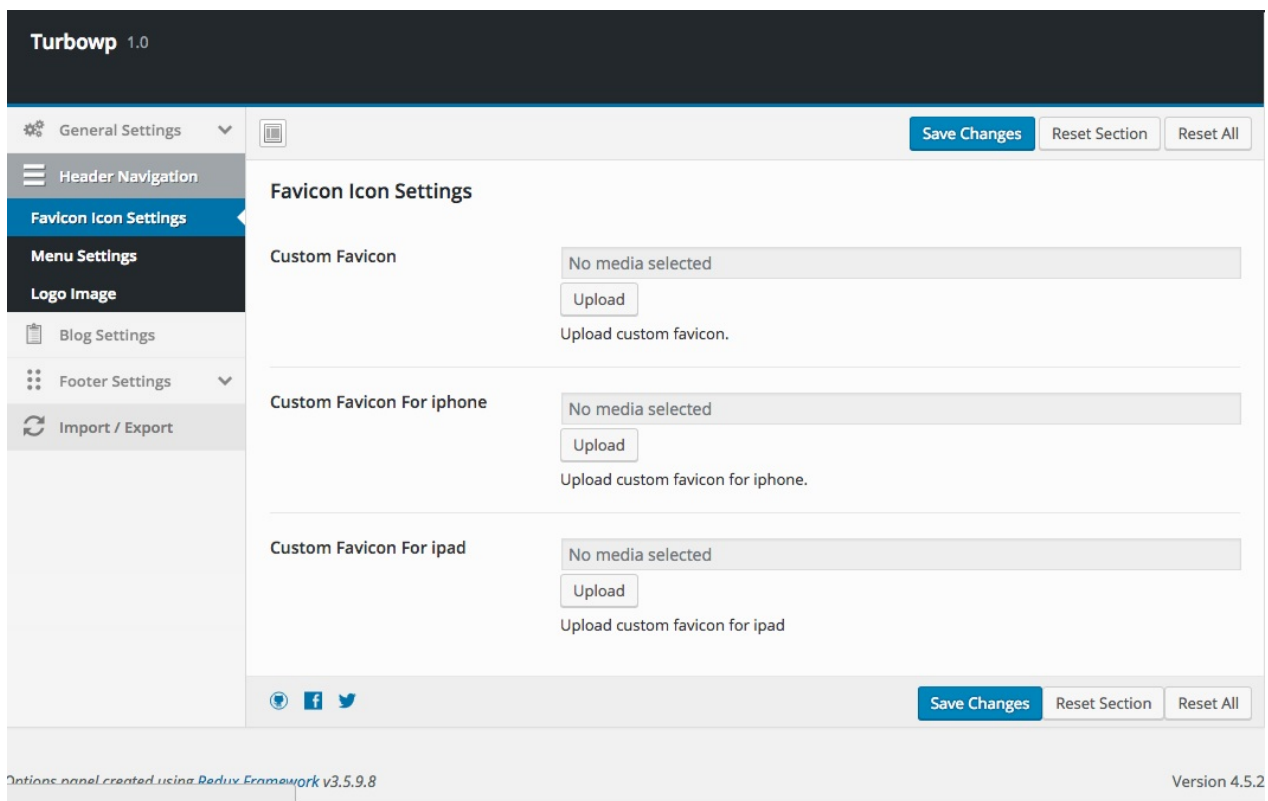

Header Navigation Settings

Header navigation settings consists of three parts

1. Favicon Settings
2. Menu Settings
3. Logo Image

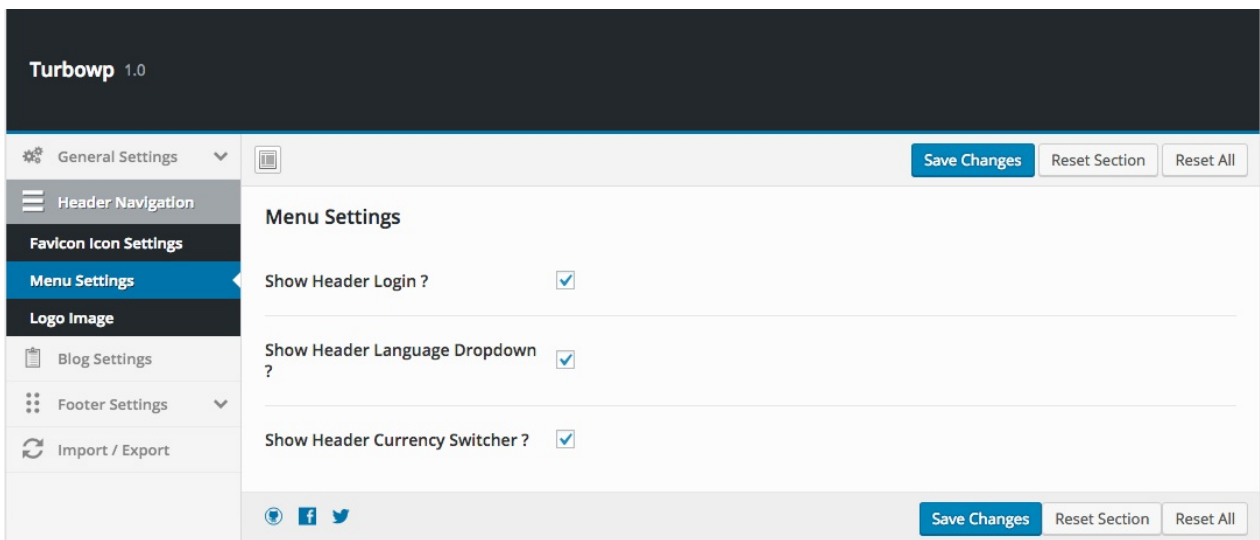

Favicon Icon Settings

In header settings user can upload custom favicon for other devices according to their image ratios.

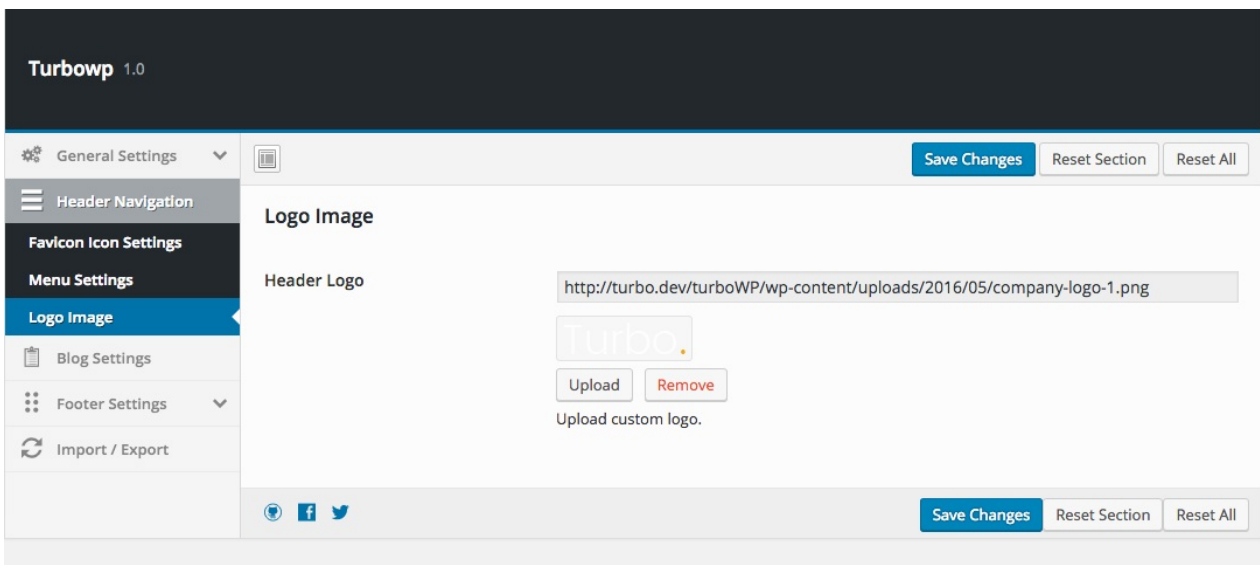

Menu Settings

In menu settings there are some control options for logo, header language, currency section

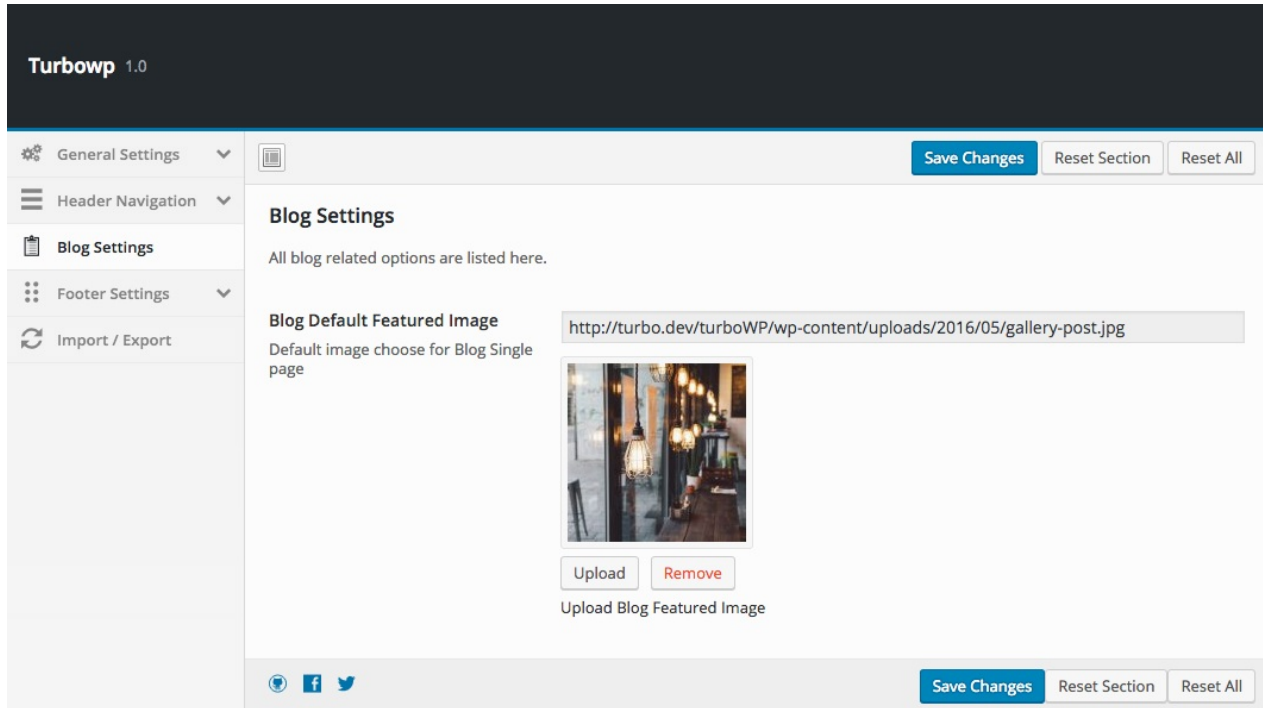

Logo Image

This is the section to upload the header logo of the theme.

Blog Settings

In blog settings it has options to upload the default thumbnail/featured image for the blog single page.

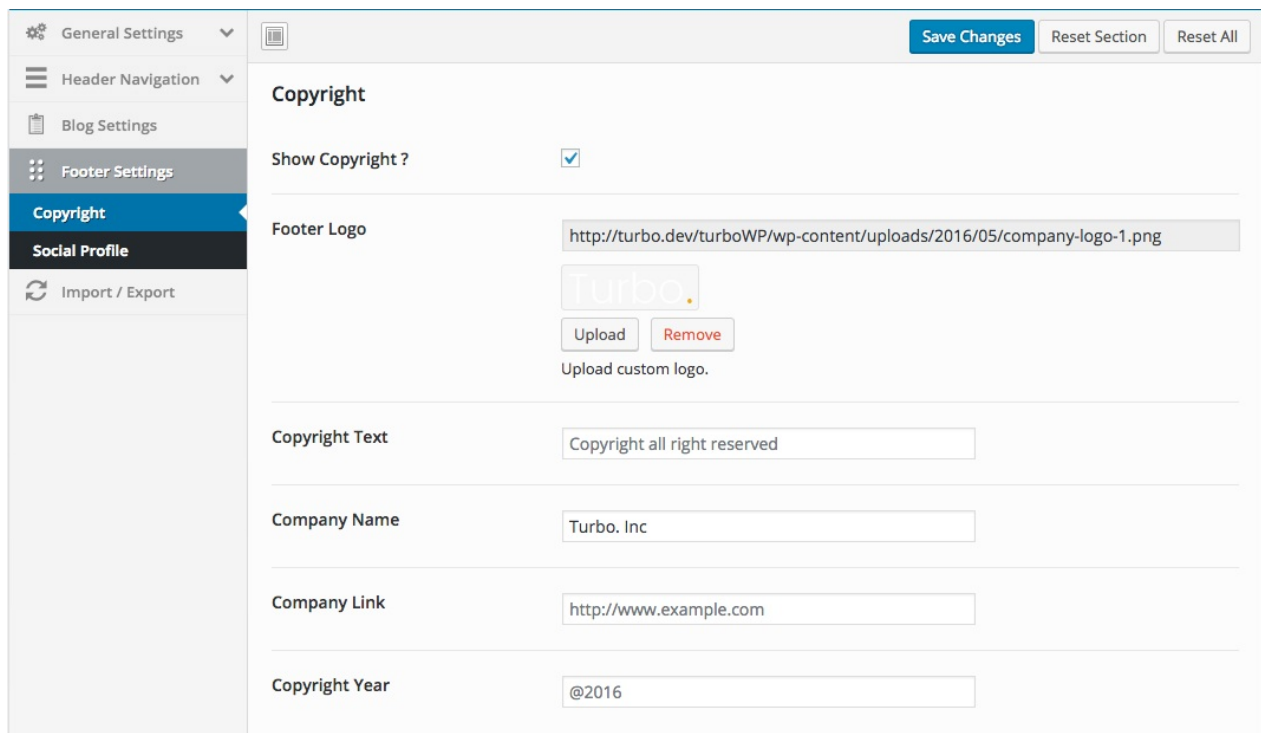

Footer settings

Footer settings consists of two sections.

1. Copyright
2. Social profile

Copyright

In copyright section, it has the information text fields to insert data/info into footer section.

The screenshot shows a dashboard interface for the 'Copyright' settings. On the left is a sidebar menu with options: General Settings, Header Navigation, Blog Settings, Footer Settings (expanded), Copyright (selected), Social Profile, and Import / Export. The main content area is titled 'Copyright' and includes a 'Save Changes' button and 'Reset Section' and 'Reset All' buttons. The settings are as follows:

Setting	Value
Show Copyright ?	<input checked="" type="checkbox"/>
Footer Logo	<input type="text" value="http://turbo.dev/turboWP/wp-content/uploads/2016/05/company-logo-1.png"/>  <input type="button" value="Upload"/> <input type="button" value="Remove"/> Upload custom logo.
Copyright Text	<input type="text" value="Copyright all right reserved"/>
Company Name	<input type="text" value="Turbo. Inc"/>
Company Link	<input type="text" value="http://www.example.com"/>
Copyright Year	<input type="text" value="@2016"/>

Social Profile

In social profile section admin has access to connect all his/her social media/profile connection.(e.g. facebook, twitter, linkedin, google plus, rss, stackoverflow, dribble, github etc...)

Turbo Product Creation

For creating Rental & Booking Product please follow this link. Here is given a brief discussion about product creation.

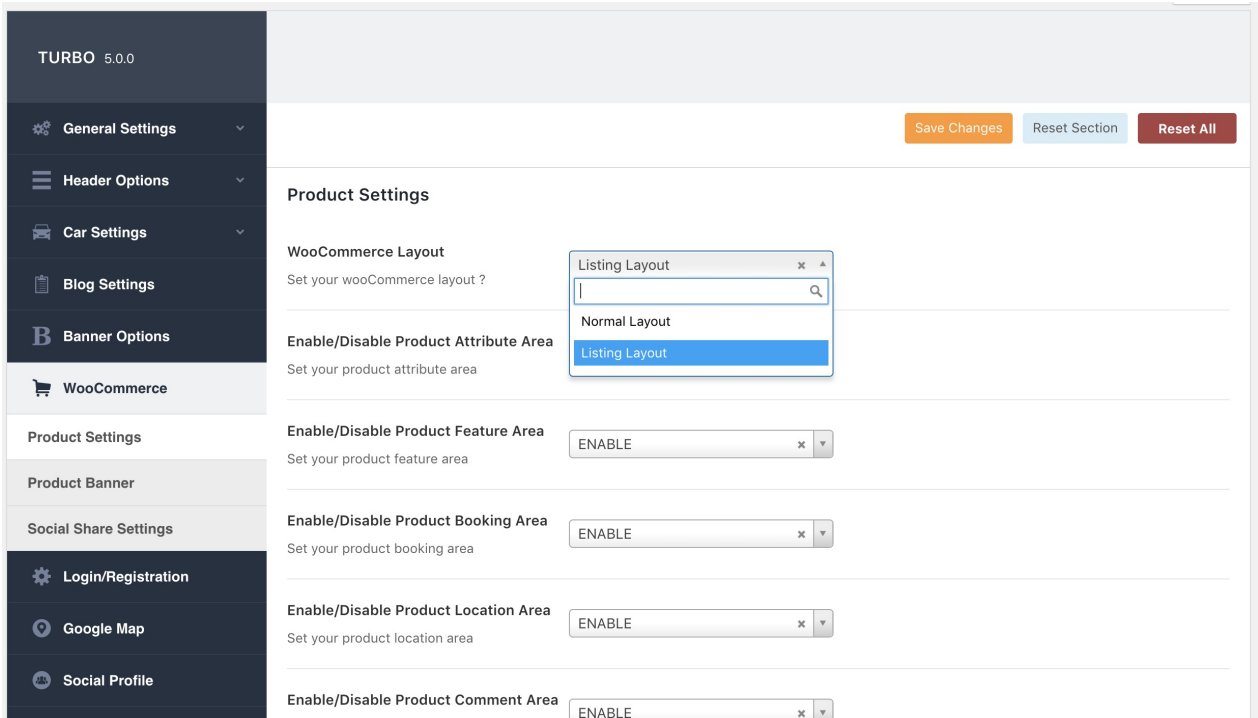

[WooCommerce Rental & Booking Documentation](#)

How Does Attribute Work ?

You've to create attributes from Inventory->attributes taxonomy. You have to make the attributes highlighted term meta as yes if you want to show them in property listing page. For more info you can check our online docs for rental plugin

<https://redq.gitbooks.io/woocommerce-rental-and-booking/content/product-create.html>

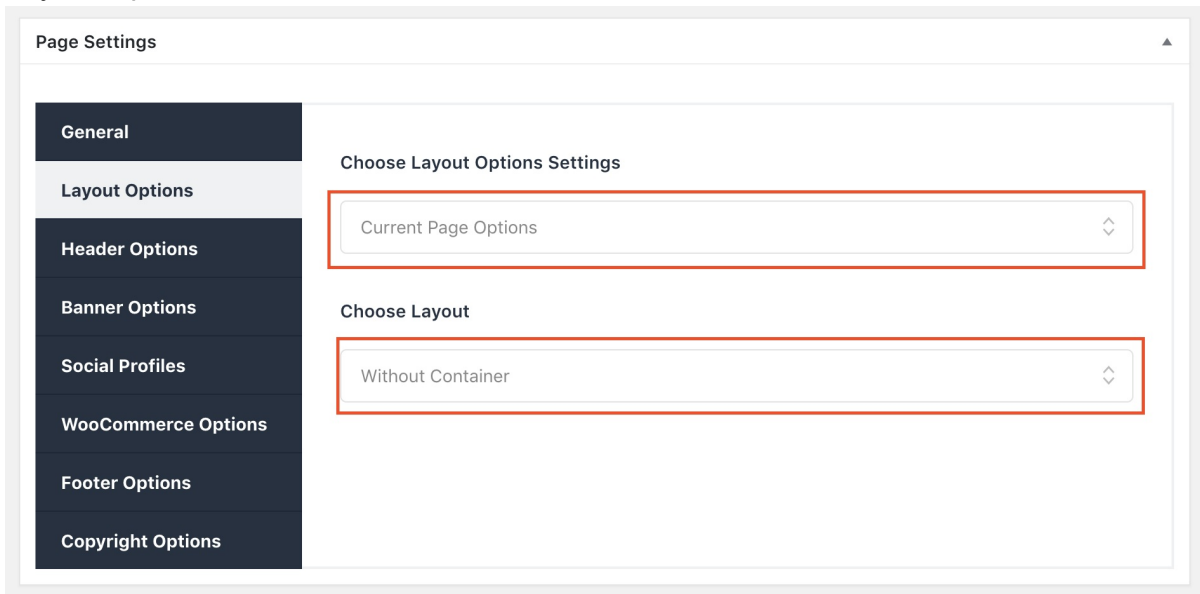

Go to the theme option panel (Turbo Options). Then proceed to **WooCommerce** --> **Product Settings**. Now from Product Settings go to **WooCommerce Layout**. From WooCommerce Layout choose the layout **Listing Layout**.

Then click on **Save Changes**.

Go to home page settings via edit page.

5. Final output of home page:

Go to reactive builder from dashboard and add a new reactive builder.

Copy the reactive key.

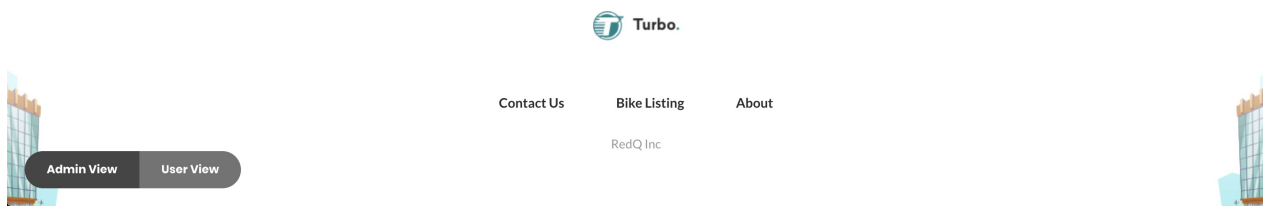

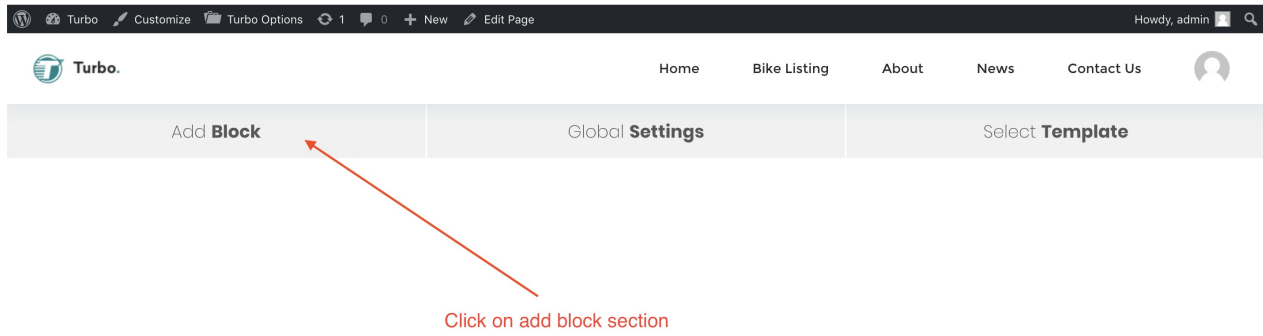

The screenshot shows the Turbo Listing Home editor interface. A 'Text Block Settings' dialog box is open, displaying the 'General' tab. The text area contains '[reactive key="1078"]'. The dialog has 'Close' and 'Save changes' buttons. In the background, the 'WPBakery Page Builder' sidebar is visible with a 'Classic Mode' button and a 'Text' block selected. The right sidebar shows 'Publish' settings, including 'Status: Published', 'Visibility: Public', and 'Published on: Nov 17, 2018 @ 07:46'. Below that, 'Page Attributes' are shown with 'Parent' set to '(no parent)' and 'Template' set to 'Default Template'.

Let's see the home page again.

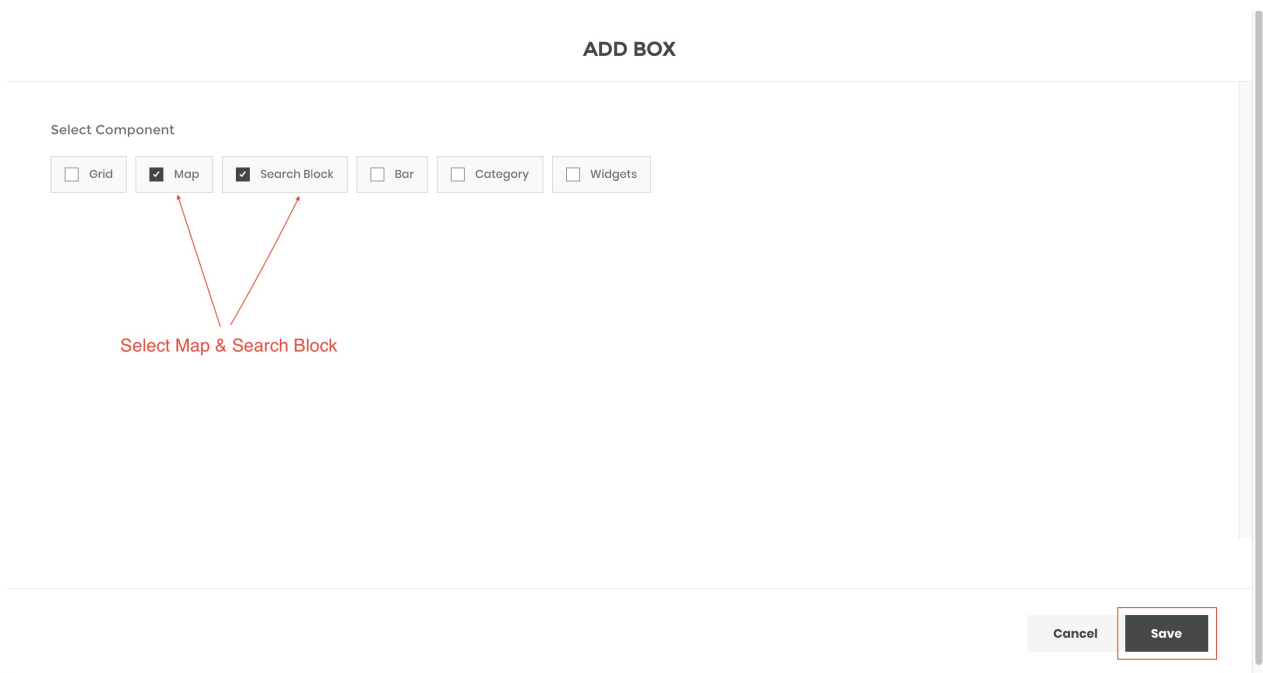

The screenshot shows the front page of Turbo Listing Home. The top navigation bar includes the Turbo logo, 'Home', 'Bike Listing', 'About', 'News', and 'Contact Us' links, along with a user profile icon. Below the navigation is a grey bar with three buttons: 'Add Block', 'Global Settings', and 'Select Template'. The main content area features the Turbo logo, a 'Contact Us' link, 'Bike Listing' and 'About' links, and 'RedQ Inc' text. At the bottom left, there are 'Admin View' and 'User View' buttons. The page is decorated with blue and orange architectural illustrations on the sides.

Click on Add Block.

Third Step

Select Map and Search Block

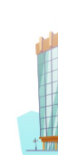

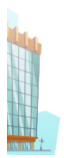

Le's see the home page again.

No Map API Key Provided

Please Add Some Options

Now you will have this output on your home page.

The screenshot displays the Turbo website's home page. At the top left is the Turbo logo. The navigation menu includes 'Home', 'Bike Listing', 'About', 'News', and 'Contact Us', followed by a user profile icon. The main content area features a map of the United States with a search overlay titled 'Find your car'. The search form contains the following fields: 'Choose your category', 'Choose car feature', 'Start Date', 'End Date', and 'Choose car attributes', each with a dropdown arrow. A 'Find a car' button is positioned to the right of these fields. Below the map, there are 'Admin View' and 'User View' buttons, and the Turbo logo is centered at the bottom.

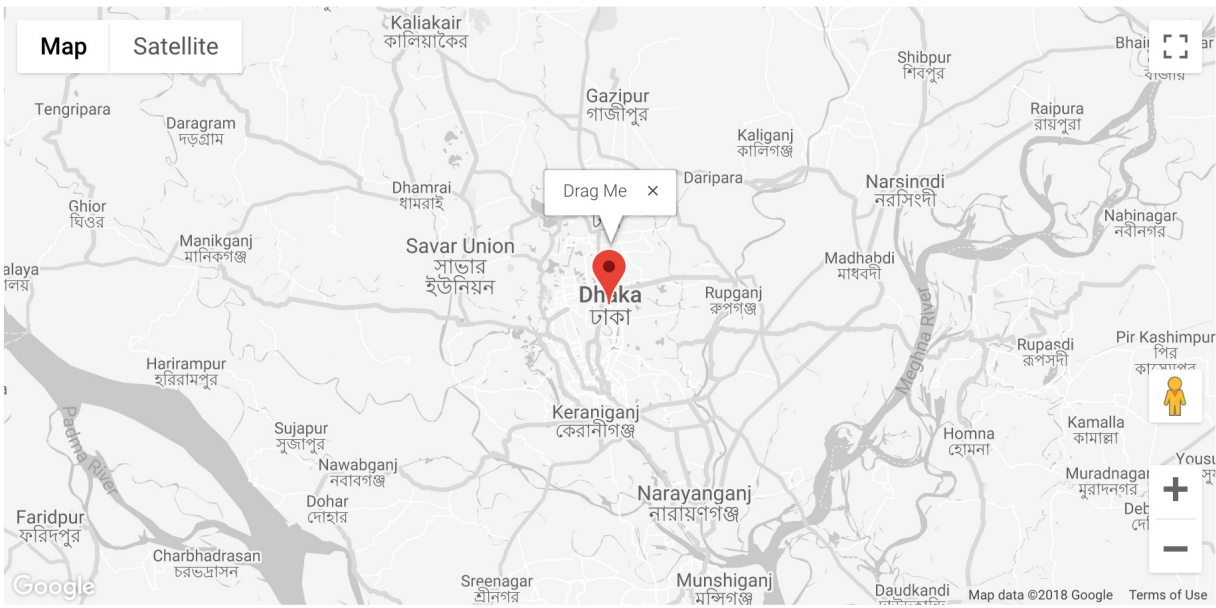

To add Map marker go to Dashboard-->Reactive-->Geobox

Now go to your Products-->All Products-->Edit Product

    </div>
  </div>
  <div class="opacity-height"></div>
</div>

```

Now go to home page and click on the settings icon of Map. From Map go to Template tab and select your Info Window Template just you have created previously and click on save button.

MAP

Appearance **Template** Marker Icon Settings

Select Info Window Template

Turbo Info Window companyBuilder companyBuilder companyBuilder

Select Icon Template For map

Light Dark Turbo Listing Marker sample sample sample

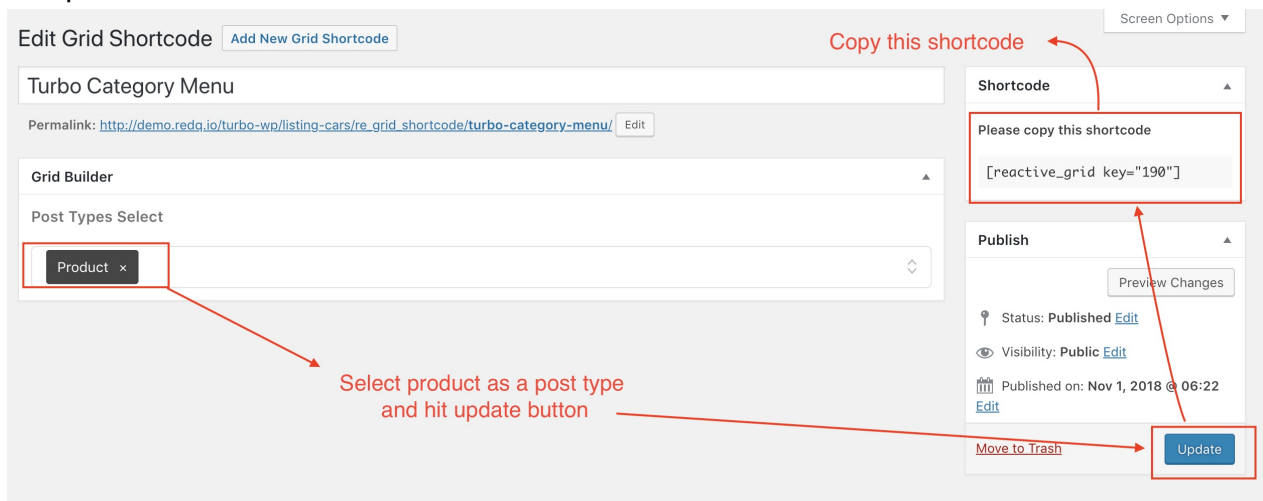

Delete **Cancel** **Save**

Select your map info window template and hit save button

Now you have Map Info Window in home page's Map while you click on the marker.

The screenshot shows a Google Map interface. At the top left, there are tabs for 'Map' and 'Satellite'. A map of the Arctic region is displayed with a location marker. An info window is open over the marker, showing a car listing: 'Brooklyn, Newyork', 'Men's S-Works Tarmac Ultralight', '\$35 USD', and a 'View Details' button. Below the map is a search bar titled 'Find your car' with fields for 'Choose your category', 'Choose car feature', 'Start Date', 'End Date', and 'Choose car attributes', followed by a 'Find a car' button. At the bottom left, there are 'Admin View' and 'User View' buttons.

This step is for creating a category Menu slider. To do this go to Dashboard-->Reactive Templates-->All Grid Shortcodes-->Add New Grid Shortcode.

Now go to your home page and click edit page. Add a fancy title block. Your fancy title layout should be listing fancy title. Then add a new row and paste Grid Shortcode key you just have created previously. Then click update. Below is the sample of a screenshot.

Now go to home page and you will see the category menu slider.

Explore By Type

Settings

You may notice that Explore By Type is not similar to our demo. But there is a procedure to match it with our demo. To achieve this at first write a new category menu grid template. So go to Dashboard-->Reactive Templates-->All Category Templates-->Add New Category Template.

            var categoryId = `${texCategoryId}${category.slug}`;
        #>
        <!-- Grid -->
        <div key=src={{ category.ID }} data-uid={{ category.ID }} class="reactiveCatGridType-Simple fadeIn">
            <div class="reactiveGridContent">
                <a href="{{categoryId}}" target="_blank">
                    <# if(category.term_meta && category.term_meta.thumbnail_id) { #>
                        <img src={{ category.term_meta.thumbnail_id }}>
                    <# } else {#>
                        <img src={{ data.gridPlaceholder }}>
                    <# } #>
                    <div class="img-caption">
                        <h3 class="catTitle">{{ category.name }}</h3>
                        <p class="totalCat">
                            <# if (totalCategories > 1) { #>
                                {{ totalCategories }} cars
                            <# } else { #>
                                {{ totalCategories }} car
                            <# } #>
                        </p>
                    </div>
                </a>
            </div>
        </div>
        <!-- Grid End -->
    <# }) #>
</div>
</div>

```

Now go to your home page and click on setting bar under your category title Explore By Type.

In External Grid Settings go to Settings tab then select Grid Type Taxonomy then product_cat.

Now go to Layouts tab and choose Category Layout you just have created previously. Then click on save button.

Now go to home page and see the view of Explore By Type. Now it is similar to our demo.

Now the step is to create a Product Grid on home page. So go to Dashboard-->Reactive Templates-->All Grid Shortcodes-->Add New Shortcode.

The screenshot shows the 'Edit Grid Shortcode' interface. At the top, there's a title 'Turbo Grid Product' and a 'Permalink' field with the URL 'http://demo.redq.io/turbo-wp/listing-cars/re_grid_shortcode/turbo-grid-product/'. Below that is the 'Grid Builder' section with a 'Post Types Select' dropdown menu where 'Product' is selected. To the right, the 'Shortcode' field contains the code '[reactive_grid key="191"]'. At the bottom right, there's a 'Publish' section with an 'Update' button. A red arrow points from the 'Product' selection in the dropdown to a red text instruction: 'Select product as a post type and hit update button'. Another red arrow points from the 'Update' button to the same instruction.

Now go home page and click on edit page. Add a fancy title block. Your fancy title layout should be listing fancy title. Then add a new row and paste Grid Shortcode key you just have created previously. Then click update. Below is the sample of a screenshot.
