

DY'ON[®]

BLACK

Create deep black (ebony) appearance in brown colored ponds or lakes.

GENERAL INFO

DY'ON[®] Black is a concentrated formulation of a unique pond and lake colorant designed to aesthetically improve the appearance of shallow and/or muddy ponds and lakes. DY'ON Black is harmless to humans and wildlife, and once incorporated into the lake or pond will not stain humans, birds or fish..

USAGE:

Dy'ON Black should always be added from several locations around the pond to insure even dispersion. Wear rubber gloves and eye protection when handling DY'ON Black to protect hands and eyes from staining.

DY'ON Black should be applied at the rate of 1.5 to 2 qts. per surface acre of water 4 feet deep.

- First, measure the pond or lake.
- Then calculate the amount needed to color the water.
- Next, add approximately half that dosage from several parts of the lake or pond being colored.
- Once the first half of the dosage is incorporated, add the balance of the colorant until the desired color is achieved.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin, eyes and clothing. If product comes in contact with skin, wash thoroughly with soap and water. In case of eye contact, wash thoroughly with clear water and consult a physician. Affected clothing should be removed and washed thoroughly before reusing.

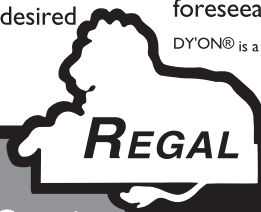

STORAGE AND HANDLING

Keep product closed when not in use. Store in a cool dry location.

NOTICE TO BUYER:

Seller warrants this product conforms to the label description and based on tests believed to be reliable. However, field conditions vary widely, so the user should determine the suitability of DY'ON Black for his particular application. No other warranty expressed or implied is made by seller. Buyer assumes all risk for any use condition not reasonably foreseeable to Seller.
