

DY'ON[®]

GREEN

GENERAL INFORMATION

DY'ON[®] Green is a green, water-soluble dye. Used in spray solution, it furnishes a dark green tint to sprayed vegetation. DY'ON Green allows coverage without skips or overlaps.

SPRAY INDICATOR:

Add 1-2 pints of DY'ON Green to 100 gallons of water. Local conditions and water quality may require more or less dye, but more dye can be added to spray tank if insufficient color is produced. Chlorinated water may call for additional dye to obtain desired color in spray solution.

NOTICE TO BUYER:

Seller warrants this product conforms to the label description and based on tests believed to be reliable. However, field conditions vary widely, so the user should determine the suitability of DY'ON Green for his particular application. No other warranty expressed or implied is made by seller. Buyer assumes all risk for any use condition not reasonably foreseeable to Seller.
