

MAXI GREEN II®

Chelated Micronutrients

Greens
& Tees

Fairways

Commercial & Residential
Lawn Care

Sports Fields
& Parks

Ornamentals
& Nurseries

MaxiGreen II® stimulates chlorophyll production for better color and plant vigor. When applied to either plant foliage or watered into the soil, plant color improves within hours. MaxiGreen II is recommended for greens, tees, fairways, commercial and residential lawncare, ornamentals, sports fields, parks, and nurseries.

Other benefits include:

- Tank mix compatible with most products
- Chelated to prevent fixation in soil
- Low/non-staining
- Can mask the bronzing from application of growth regulators
- Long-lasting

Features 7 nutrients

- 2% Soluble Potassium (K₂O)
- 1% Magnesium (Mg)
- 2% Sulphur (S)
- 2.5% Iron (Fe)
- 0.02% Boron (B)
- 0.05% Manganese (Mn)
- 0.05% Zinc (Zn)

Best when applied spring through fall

Available in 2 x 2.5 gallon cases
and 30, 55 and 250 gallon drums

MAXIGREEN II® Applications

GREENS & TEES

- On greens use 4 to 6 oz. per 1000 sq. ft. bi-weekly for color, quality, stress relief and recovery. Apply during late spring through early fall. During late fall and early spring use MultiGreen II.®
- On tees, to maintain color and quality apply 3 to 5 oz. per 1000 sq. ft. bi-weekly to monthly.
- On tees to aid recovery and treat stressed areas apply 5 oz. per 1000 sq. ft. bi-weekly with Muscle,® Regal Crown® and Regal® liquid nutrients.

FAIRWAYS

- During spring green up apply 2 to 4 oz. per 1000 sq. ft. when turf begins active growth to improve early-season color and quality.
- Apply with Solace and other growth regulators at 3 to 5 oz. per 1000 sq. ft. to mask bronzing.
- For stressed areas and to aid in recovery apply 5 oz. per 1000 sq. ft. bi-weekly with Muscle, Regal Crown and Regal liquid nutrients.

COMMERCIAL & RESIDENTIAL LAWN CARE

- For warm season grasses apply 4 to 6 oz. per 1000 sq. ft. monthly during summer months.
- For big events apply 4 to 6 oz. per 1000 sq. ft. prior to the event for optimal turf color and quality.
- Excellent tank mix partner with fungicides, insecticides, and growth regulators to mask bronzing.

SPORTS FIELDS & PARKS

- For warm season grasses apply 4 to 6 oz. per 1000 sq. ft. monthly during summer months.
- For big events apply 4 to 6 oz. per 1000 sq. ft. prior to the event for optimal turf color and quality.
- Excellent tank mix partner with fungicides, insecticides, and growth regulators to mask bronzing.

ORNAMENTALS & NURSERIES

- Use in **Regal Grow Program**. Apply 1 gallon of MaxiGreen II in 100 gallons of water. Use alone or in combination with Regal Crown, Muscle, Bridle,® Fenox,® ConSyst,® SyStar® and Resyst.®
- Good source of micro nutrients and potassium during summer months resulting in optimal color and minimal foliage growth. Apply 1 gallon of MaxiGreen II in 100 gallons of water until plants are drenched.

These are general recommendations. For specific directions on product usage and rates, timing and mixing, please refer to the MaxiGreen II product labels at regalchem.com.
