FIRST AID MEASURES

[DESCRIPTIONS]:

General: In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.
Inhalation: Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious, place in the recovery position and obtain immediate medical attention. Give nothing by mouth.
Eyes: Irrigate copiously with clean fresh water for at least 10 minutes, holding the eyelids apart and seek medical attention.
Skin: Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser. Do NOT use solvents or thinners.
Ingestion: If accidentally swallowed, obtain immediate medical attention. Keep at rest. Do NOT induce vomiting.

[MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED]:

Overview: No data available. See Section 2 for further details.
Eyes: Causes serious eye irritation.
Skin: Causes mild skin irritation.

SECTION 5**FIRE FIGHTING MEASURES**

Extinguishing Media: Recommended extinguishing media: alcohol resistant foam, CO₂, powder, water spray. Do not use water jet.

Special Hazards: Can be dangerous when exposed to extreme heat and flame. Irritating or toxic substances may be emitted upon thermal decomposition. Thermal decomposition products may include oxides of carbon as well as smoke and fume.

Advice For Firefighters: Cool closed containers exposed to fire by spraying them with water. Do not allow run-off water and contaminants from fire-fighting to enter drains or water courses.

ERG Guide No. -----

SECTION 6**ACCIDENTAL RELEASE MEASURES**

Personal Precautions, Protective Equipment and Emergency Procedures:

Remove sources of ignitions, do not turn lights, or unprotected electrical equipment, on or off. In case of a major spill, or spillage in a confined space, evacuate the area and check that solvent vapor levels are below the Lower Explosive Limit (LEL) before re-entering.

Environmental Precautions: Do not allow spills to enter drains or water courses.

Methods and Material For Containment and Cleaning Up:

Ventilate the area and avoid breathing vapors. Take the personal protective measures listed in Section 8. Contain and absorb spillage with non-combustible materials (e.g. sand/earth/vermiculite). Place in closed containers outside buildings and dispose of according to the Waste Regulations (see Section 13.) Clean, preferably with a detergent. Do not use solvents. Do not allow spills to enter drains or water courses. If drains, sewers, streams or lakes are contaminated, inform the local water company immediately. In the case of contamination of rivers, streams, or lakes, the Environmental Protection Agency should also be informed.

SECTION 7**HANDLING AND STORAGE**

Precautions For Safe Handling: Handle containers carefully to prevent damage and spillage. See Section 2 for further details [PREVENTION].

Conditions For Safe Storage: Handle containers carefully to prevent damage and spillage. Do not get in eyes, on skin or on clothing. Do not breathe vapors or mists. Keep container closed. Use only with adequate ventilation. Use good personal hygiene practices. Wash hands before eating, drinking, smoking. Remove contaminated clothing and clean before reuse. Unless heated, sprayed or agitated, normal ventilation should be adequate. See Section 2 for further details [STORAGE].

Incompatible Materials: Oxidizing agents.

Specific End Use(s): Adjuvant for pesticides.

SECTION 8**EXPOSURE CONTROLS/PERSONAL PROTECTION**

Exposure Data: This product contains no ingredients with established limits for exposure.

Carcinogen Data: This product contains residual amounts of the following chemicals that are suspected or known to be a carcinogen or reproductive toxin.

• 1-4 Dioxane

• Oxirane

[EXPOSURE CONTROLS]:

Respiratory: If workers are exposed to concentrations above the exposure limit they must use the appropriate, certified respirators.

Eyes: Wear safety eyewear (e.g. safety spectacles/goggles/visors) to protect against the splash of liquids.

Skin: Overalls, which cover the body, arms, and legs, should be worn. Skin should not be exposed. All parts of the body should be washed after contact.

Engineering Controls: Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates, and any vapor below occupational exposure limits, suitable respiratory protection must be worn.

Other Work Practices: No data available. See Section 2 for further details [PREVENTION].
