LIQUIGREEN®

Directions for Use

Recommended Rates

For best results apply as a foliar spray in sufficient water for thorough coverage (typically 1 to 2 gallons per 1000 sq. ft.). When applying higher rates of products, and for maximum plant uptake and safety of all foliar fertility applications, it is best to water product to the soil surface before the warmest part of the day.

Greens & Tees:

2 to 22 oz. per 1000 sq. ft. (0.045 – 0.50 lbs. N per 1000 sq. ft.) every 7 to 14 days.

Fairways & Other Turf:

2 to 44 oz. per 1000 sq. ft. (0.045 – 1.0 lbs. N per 1000 sq. ft.) every 7 to 28 days.

Trees & Ornamentals:

1 to 8 qts. per 100 gal water as soil drench as necessary.

Apply fertilizer in accordance with best management practices established by your local Cooperative Extension or State University. Observe any State or local fertilizer regulations pertaining to content or timing of application.

Storage & Container Disposal

Store above 32 degrees Fahrenheit. Store in dry place in original container only. Keep lid tightly closed. Keep away from flames and intense heat. Dispose of containers in accordance with local regulations.

Conditions of Sale

Seller warrants that products will be labeled as required under state and federal laws. Any non-conformance must be reported to seller in writing within 30 days after purchase. Buyer agrees to inspect all products purchased immediately upon delivery. Seller's liability under this warranty is in lieu of any other warranties, expressed or implied, including warranties of merchantability. There are no warranties which extend beyond this statement.
