Frequently Asked Questions

What is a remote medical scribe?

A remote medical scribe is a trained professional who assists healthcare providers with documentation and administrative tasks, primarily through virtual means, such as video conferencing or phone calls.

How does a remote medical scribe differ from an in-person medical scribe?

The primary difference between a remote medical scribe and an in-person medical scribe is the location of the work. While an in-person medical scribe works alongside a healthcare provider during patient visits, a remote medical scribe works from a separate location.

What are the benefits of using a remote medical scribe?

Using a remote medical scribe can provide several benefits, including increased efficiency and productivity for healthcare providers, improved

accuracy in documentation, and reduced costs associated with hiring and training additional staff members.
