7 EASY Ways to collect GREAT Customer Reviews! And... Auto-Syndicate them so they're found Everywhere Online

New Prospects will Pick You to do business with when they read
RAVE Reviews from your Customers Online!
NOT your competition!

You'll Bring in NEW Traffic, Leads and Sales on Autopilot!

*Learn How to: Build your Company's Bullet-Proof 5-Star Reputation
Dominate your Market and Kick your Competition to the Curb!*

Today every business owner has the Same HUGE Challenge that looms Far
Above every other issue affecting any local business.

And - Here it is:

1st you need to be found online. DUH.. A little too simple right?

***2nd you've got to have Great Customer Reviews - to build trust with new
prospects searching online so they call you NOT your competition.***

*Think about it for a moment: Lets say you can be found online, your SEO and
keyword research are great but.. you don't have any customer reviews or worse
yet you have Bad Reviews... It's simple - You won't get the new customer. Your
competitor who Has Great Reviews will get the New Customer every time Not
You!*

Getting found online is only ½ the battle today.

Not only do you need to be found... You need to be the Clear and Obvious
choice when someone searches, lands on a page filled with results from your
company and your competition... Then as a hot new prospect looks through all

the results.. finding Lots of Awesome Reviews from your happy customers will insure that You get the Call or Sale NOT your competition. Optimally your goal is to Dominate that page with as many listings as you can! (we will show you a solution for this too!) The simple fact is... There needs to be a Clear and obvious reason WHY your company is the BEST CHOICE. *“There is Simply no better advertising any company can EVER have - other than their happy customers Raving about their products and services to the world!”*

Lets take it one step further.. What if you could Dominate Page One Results for the right “*Buyer Phrase Keywords*” AND you had LOADS of **Awesome 5-Star Customer Reviews filling up the page?** Your Customers stating how awesome your business is! Customer Reviews & Feedback in, Blog posts, Social Media Posts, Citations, Images and the real kicker - Videos of your customers singing your praises to the world!

WOW - wouldn't it be awesome to dominate the entire page, or even just ½ of the First Page? We all know that Page One results get 90% of all Traffic Leads and Sales. It's where all businesses want and need to be.

QUESTION: Do you Know what your “Buyer Phrase Keywords” are do you know what your customer Avatar is? These are the Laser Targeted Keywords that drive the Exact customer avatar you need - to your pages to images, videos and more. This critical data controls how you optimize your spending, build your pages, and laser target your “Perfect Match Customer” to what you sell. More on this later!

But, lets assume you already “Get” Buyer Phrases and Customer Avatars On page and off-page SEO, and you have consistent traffic to your offers, your sites,

your pages etc.. But the traffic is NOT converting into new business like you think it should, and you are not sure why.

If you get nothing else from this PDF except what you are about to learn... then consider it a Home Run! You'll SAVE Boatloads of money on PPC and stop sending sales to your competition (on your dime).

Here is why you are losing Leads and Sales - you don't have awesome Customer Reviews online. Or, you just have a few when your competition has many... or, you have bad reviews. Lets face it when someone searches online and finds just one bad review - you are Dead in the water! *But this can be fixed easily!*

Here's the process...

Tell me if you do same thing when you search online... like 90% of all people do. 1st you look for a product or service online that you need or want. Then you narrow down the field of choices by color, service, sub service, size - whatever.. Then you focus in on a specific local area where you live, work or play (your market area).. ah now we are getting somewhere.. OK now we have a list of tightly focused companies that have exactly what we want or need!

If you are like me - your next step will be to look at their websites or pages. Maybe you eliminate a few of them if they don't look professional enough, if their site isn't viewing fast enough, or doesn't look right on your mobile device.

Ok what's next? Think about it - you compile your final list of 3 to 4 business. The next obvious place to look after your list is narrowed down, is for Customer REVIEWS - what are other people saying about a business online? We all do it.

You go to Google+, Facebook, Yelp, directory sites, industry specific sites and lots of other high ranking sites that have reviews on the businesses you're looking at. Then it's a simple process of elimination. When they have bad reviews they are OUT - Good ones are IN - you pick up the phone - call - and make a final selection.

So the question is: Does your business have Great Reviews Online... Do you have More and Better reviews than competitors? If you don't - then every dollar you spend in advertising is driving SALES to competitors who do!

If you don't have LOTS of Glowing online reviews (and your competitors does) you are Dead in the water - you just lost a sale. All the New Leads, Traffic, and all the sales will be going to the company that has the MOST and BEST reviews online. It's common sense it's HOW people search and what they do. If you're not in the running - if you're not collecting and *SYNDICATING* your Reviews - you can't win the game.

Syndicating - Ahhhh this is where the rubber meets the internet highway! What if you could collect reviews then SYNDICATE that single review to MANY sites all at the same time and connect your buyer Keyword to it too.. do you think that would give your company the edge? You BET IT WILL! (we'll show you how).

You may be thinking I'm safe.. I don't have any bad reviews online at all. In fact I don't have ANY reviews or maybe you just have a few good ones... Here's the problem: NOT having reviews, or having too few Reviews when your competition has many Awesome Reviews... is killing your sales, Plain and Simple. You need to work from a point of strength not weakness! Take the lead before you are caught trying to catch up - playing catch up is an expensive proposition. If your

competitors don't have Reviews either - now is the time to Bury them so they can never catch up! You can ***Dominate*** your industry when you set a System in motion!. We'll show you how!

Lets face it - if you're not pro-active in getting GREAT reviews from your "Happy Customers" then you may just find some Bad reviews online about your business. Many people will take action on their own when they are unhappy! Unfortunately it's human nature, people Like to complain and the internet is a quick way for them to vent.

So, why not give them a way to vent! When you do you accomplish 2 things: You keep a bad review from posting online (you'll intercept them) and you'll find out how to improve your business from your customers feedback! It's a win win! We'll show you how to intercept their reviews, handle them, correct any problems and turn a bad review into a Good review! When you become proactive and make it EASY for customers to leave GREAT Feedback & Reviews on your business - You Win!. When you provide Multiple ways for customers to give you feedback - Hand them a Review Card - Send them an Email - Set up a Review Tablet at your business! Customers are Very-Happy to give you feedback but, you've got to make it easy for them! When you do.. *You Win!*

We suggest handing out a "Feedback Card" to every customer who buys anything from you! In fact hand it out to EVERYONE you meet! This card should lead to a page which collects their Feedback on your business, your employees, and yes even gives a you a Review. (This is a page which you control). Your Feedback card contains a QR code, a Keyword to Text #'s or a local # to call.

[Click HERE to see an Example.](#)

Lets face the facts - sending Lots of Traffic to your website, landing pages or any online offers is great... Until, a new prospect looks for Reviews and they don't find any (or too few) Awesome Reviews on your business. The last killing blow is when they decide to become a client of your competitor instead of yours. OUCH! Your competition just got a NEW Client with new Lifetime Customer Value! Pretty painful.

PAID TRAFFIC: Did you know - all the money you may be spending for SEO, PPC etc.. is actually helping your Competition!

WHAT? Follow me closely here...

You do all the work, you find the right Keywords to rank for, you pay for PPC traffic, you pay for SEO. When you pay for traffic such as adwords...- Did you know you are indirectly paying to drive Traffic to pages that have your competitions listings! This is why it is so important to make sure you have Great Reviews online and a constant flow of new reviews coming in all the time. You have to load the deck in your favor.

It's pretty simple, SEO & PPC are keyword based - so the answer is Yes. When a new customer lands on a page full of results from a search - they narrow down their choices, then look for Customer Reviews... if you are like many companies out there - this is the vital step where you drop the ball. SOmetimes in online marketing it can be the smallest things that make the biggest differences. New Prospects wind up buying from your competition who has **LOTS of RAVE REVIEWS**. But not from you. Why? Simply because you're not in the game yet... thats all.

Maybe you think your competitors are so far ahead of you, they have so many Great Reviews Online that you'll never catch up.. That couldn't be more wrong! Every action online is trackable. Here's what I mean.. what if I told you there are tools to see exactly what your competition did to get where they are. What if you knew every action they took, every page they have, how many reviews they have - then all you need to do is a Little bit more to beat them!

We hear business owners all the time say "it's too difficult to get our customers to leave reviews". It's even more difficult to get them to leave their Reviews on the top sites that really make a difference like Google+, Yelp, Facebook, Twitter and more.

Ok we get it - we have a clear picture of what the problem is - Now its time to FIX IT!

We've created a non-techie business-owner friendly system to Easily Collect Reviews from your customers in several ways. 1st Via Hand-Out Card with links to: Feedback Web Page, text messaging, or QR-Code Scan or a local phone # to call. It Also has a built in Email system for past or current customers just load up their email addresses and let the software do it's thing - automatically collecting reviews and syndicating them to social sites and more! (only when they are Good reviews Naturally)! You'll get notified of any Bad reviews immediately via SMS and Email! In addition you can Market to your customers who leave reviews through the built in Email system - send pre scheduled holiday, Birthday Special Offers or anything you can imagine! New Sales ever-ytime you click SEND!

More on this later!

● 7 Simple Ways to Collect Customer Reviews

- 1- On your website - Create a Dedicated Page to collect customer Feedback & Reviews. Then automatically redirect the customer to Google + Yelp Facebook to post it.
- 2 - Text messaging - create a 3 question review, these Reviews can be set to Auto Post to your website! (Good Reviews Only)
- 3 - On an In-Store Tablet with your own Custom APP - This App will automatically redirect the customer to Google + Yelp Facebook to post!
- 4 - Scan a QR Code & be forwarded to your Review Page
- 5 - Call a Local Phone # and Leave a Review - upload it to your site
- 6 - Click a Link on any Page and be Redirected to a Review Form
- 7 - Create a LIVE Video Review On Site! Just use your iPhone or Android Phone to record the Review! Then Share it Everywhere you can!
- 8 - Bonus - include your REVIEW Card or LINK in EVERY Email you send out Remember you don't need to worry about getting BAD reviews since You'll intercept them!

Create a steady flow of NEW Awesome Customer Reviews

Having a Steady Flow of new Customer Reviews & Feedback each week then syndicating that feedback through Videos, Social Content, web Posts and more - is the Missing Link from your Sales Funnel - When you conquer this you'll watch as all your sales Magically Increase across all of your pages - Plain and Simple.
