Hatteras inlet fishing report

North Carolina's abundant fishing waters are world famous. When the Gulf Stream flow is less than 40 miles from many parts of the central coast, numerous billfish species and other perennage favorites appear in NC waters. Sailfish, king mackerel, blue marlin, wahoo, tuna and mahi mahi are just a few of NC's offshore species and will be there if you can put your lines in front of them at the right time. Our NC offshore fishing reports can give you an added edge to hot spots, boards and catches to make your reels buzz. We are always looking for more and better offshore fishing reports, drop us a line if you see a detailed and regularly updated report that is missing. Standing on the beach with slippers in the sand and a few lines in the water can make for a really great way to spend a few days on the North Carolina coast or the Outer Shore. NC's Outdoor Banks has always been home to the best surfing fishing, but getting an indoor trough with a good surf fishing report before the casting starts can mean the difference between a good weekend and a great weekend with a cooler full of fish. We've combed the web and asked our friends for their trusted sources to provide you with some of the best NC surf fishing reports. We're always looking for higher quality surf fishing reports, be sure to drop us a line if you see a good report that we've missed. - Hot times - OK Opportunities Species JAN FEB MAR APR MAY JUN JUL AUG SEP OCT DEC Black Drum Bluefish Flounder Red Drum (aka Redfish, Puppy Drum) Spanish mackerel sea mug (aka Whiting) Spotted trout striped bass * Seasons vary depending on location in NC, sometimes up to a few weeks. Rain and wind for most of the day kept most people off the beach. High today was 72F with wind from SW at 32mph. The winds will stay here most of tomorrow.
