

Steelcase Virtual PUCK Client v1.3.2

Software Release Notes

Overview

This document contains release notes for the Virtual PUCK client application that integrates with Steelcase media:scape and allows wireless content sharing from a laptop.

What's New

- Search for a space when requesting the on-screen 4-digit passcode.
- Specify a custom Steelcase Application Server address apart from the default address 'scs-virtualpuck-registry'.

Defect Fixes

- Windows 8.1 & Windows 10 client no longer crashes with resolutions greater than 1920x1080p.

Open Defects

- Windows client application - When searching for a room to request a code; the room name field has to be blank to see the complete drop down list.
