

# Steelcase

## Software Release Notes

### Overview

This document contains release notes for the Virtual PUCK receiver update (3.0). This update is for use with the m:s Manager application. Functionality in the VP admin app has been deprecated.

### What's New

- This update works with all versions of the Virtual PUCK receiver hardware.
- This update is only compatible with SAS 3.0.
- Virtual PUCK receivers can now be configured in the m:s Manager application
- Functionality in the VP admin app has been deprecated.
- The VP admin app can be used to
  - Set the room name
  - Update software for the Virtual PUCK
  - Change the admin password for the receiver
  - Set the address of the Steelcase Application Server

### Known Defects

- Localization: 'Portal' not translated to 'media:scape Manager' on VP admin page. Link points to m:s Manager.
