

Company Profile

Revere designs and manufactures control systems for a variety of industrial applications, with strong emphasis on private labeling for OEM customers in municipal water and wastewater.

As an independent systems integrator, our allegiance is only to our customers. We provide FEED and conversion audit services as you plan your projects. We will help you select the most reliable and cost-effective automation solutions. Whether your needs require turn-key, automation EPC or involve process or power controls, industrial networking, plant information systems, drives, or safety solutions, we have the skills and experience to engineer and deliver a solution you can count on to support plant productivity and energy efficiency.

We provide things many other system integrators don't; like full simulation testing prior to shipment and a comprehensive documentation package. All job information, including drawings and O&M manuals, is available 24/7 through our web-based extranet system. And in addition to being CSIA Certified, we have also attained "solution provider" status with major hardware and software suppliers.

Facilities include approximately 64,000 square feet of production and administrative space

Personnel:

- Total staff of 200
- 100 designers and engineers
- 5 IT and networking staff
- 10 PMI-certified project managers
- PE credentials in more than 30 states

Key Contacts

Greg Graves, Sales VP	205.271.9755
Leelon Scott II, OEM Director	205.271.9736
Krista Ramirez, OEM	205.725.3689
David Williams, Engineering Support	205.271.9773
Jason Leeper, Texarkana Office	903.716.7034

From automation EPC projects to comprehensive after-market services, we are confident you will find us responsive to your needs and that you will understand why we say that Revere is engineered to serve.

Industries Served:

Oil & Gas
Water & Wastewater (Clean Water)
Metals—Steel, Aluminum, and Foundries
Mining & Material Processing
Specialty Chemical
Wood Products
Electric Utility Power
Textile & Non-Woven

Services Provided:

Professional Consulting
Control & Power System Integration
Industrial Network & Cyber Security
Wireless Communication Architecture
Control Panel Assembly
Electrical Installation
Legacy Controls Migration
On-Site Support

Capabilities:

Process Control
Discrete Control
Design-Build Services
15 kv and below Motor Control & Power Distribution
Drives and Drive Systems
Industrial Network & Wireless Solutions
Business Optimization
E-Houses
Instrument Selection & Design
Safety & Compliance Solutions
High Volume Panel Assembly
OEM Collaboration Programs
Risk Mitigation
