

Company Profile

Revere designs and manufactures control systems for a variety of applications, with particular emphasis on municipal water and wastewater, also known as clean water. As an independent systems integrator, our allegiance is only to our customers. We provide FEED and conversion audit services as you plan your projects. We will help you select the most reliable and cost-effective automation solutions. Whether your needs require turn-key, automation EPC or involve process or power controls, industrial networking, plant information systems, drives, or safety solutions, we have the skills and experience to engineer and deliver a solution you can count on to support plant productivity and energy efficiency.

We provide things many other system integrators don't; like full simulation testing prior to shipment and a comprehensive documentation package. All job information, including drawings and O&M manuals, is available 24/7 through our web-based extranet system. And in addition to being CSIA Certified, we have also attained "solution provider" status with major hardware and software suppliers.

Facilities include approximately 64,000 square feet of production and administrative space

Personnel:

- Total staff of 200
- 100 designers and engineers
- 5 IT and networking staff
- 10 PMI-certified project managers
- PE credentials in more than 30 states

Key Contacts

Nan Johnson, VP Municipal Systems	205.271.5102
Jean Mead, Florida Office	863.327.2285
Frank Gonzalez, Charlotte Office	678.722.1299
Jason Leeper, Texarkana Office	903.716.7034
Andrew Green, Birmingham Office	205.224.3977

From automation EPC projects to comprehensive after-market services, we are confident you will find us responsive to your needs and that you will understand why we say that Revere is engineered to serve.

Markets Served

Water & Wastewater
Utility Power
Foundry/Metals
Mining & Quarrying
Oil & Gas
Pipelines
Natural Gas Distribution
Machine Builders
Wood Products
Textile & Non-Woven
Professional Consulting
Control & Power System Integration
Industrial Network & Cyber Security

Capabilities

Process Control
Discrete Control
Design-Build Services
15 kV and below Motor Control & Power Distribution
Drives and Drive Systems
Industrial Network & Wireless Solutions
Business Optimization
E-Houses
Instrument Selection & Design
Safety & Compliance Solutions
High Volume Panel Assembly
OEM Collaboration Programs
Risk Mitigation

Services Provided

Wireless Communication Architecture
Control Panel Assembly
Electrical Installation
Legacy Controls Migration
On-Site Support
