Ministry Heirarchy

In 2000, the ministry of petroleum adopted an integrated strategy, the most important mechanism to implement it is to develop and amend the structure of the Egyptian petroleum sector through separating the activities of the natural gas and petrochemicals from the activities of the Egyptian General Petroleum Corporation, and establishing a strong entity for each of them, in addition to focusing the attention on Upper Egypt through establishing an independent entity. After adding the activities of the mineral resources to the duties of the ministry of petroleum and establishing the Mineral Resources Authority on the 14th of October 2004, the petroleum sector now consists of five strong entities cooperating and integrating to make the best use of petroleum and mineral resources wealth. They are: The Egyptian General Petroleum Corporation, The Egyptian Natural Gas Holding Company, The Egyptian Petrochemicals Holding Company, Ganoub El-Wadi Holding Company and The Egyptian Mineral Resources Authority.
