Project Information

Al-Nasiriya Integrated Project

Welcome to the website for the Al-Nasiriya Integrated Project conducted by the Petroleum Contracts and Licensing Directorate (PCLD) of the Ministry of Oil.

The Al-Nasiriya Integrated Project contemplates the development of the 4+ billion barrel Nasiriya oil field in Thi-Qar province together with the construction and operation of a new 300,000 barrel per day refinery. The international engineering and construction firm Foster Wheeler recently completed a Front End Engineering and Design (FEED) study for the refinery.

The Ministry of Oil is now seeking expressions of interest from suitably experienced refinery and upstream operators, who once qualified will be invited to review data packages and discuss contract terms.

Further information will be made available on the Ministry of Oil's website (<http://www.oil.gov.iq>) and on the PCLD website (www.pcldiraq.com) in due course.
