Maps

The continental margin of Ghana has seen significant increased interest and E&P activity after the Jubilee Field discovery in 2007. The Offshore Activity Map is a constantly updated record of offshore activities including awarded and relinquished acreages, contractors etc. There are currently seventeen (17) active Petroleum Agreements (PAs). All the agreements to date are for offshore concessions mostly in the Western Basin.

Additional Information

Community Relations

We protect the social, environmental and economic livelihoods of communities that are affected by the petroleum activities of oil and gas companies.
