#### Hydrocarbon production in the Utica play increasingly targets natural gas-rich areas ›

Production of oil and natural gas in the Appalachian Basin's Utica play—which includes both the Utica and Point Pleasant formations—has increased significantly since 2012. Monthly natural gas production from Utica wells increased from 0.1 billion cubic feet per day (Bcf/d) in December 2012 to more than 3.5 Bcf/d in June 2016. Oil production increased from 4,400 barrels per day (b/d) to nearly 76,000 b/d over the same period. [More](#) ›
