Consumption of energy products by types of economic activity

Oil extraction

Production of natural gas

Plant power

Power generation

Air pollutant emissions from stationary sources by economic activity types and ingredients in 2014

Air pollutant emissions generated greenhouse gases from stationary sources

Energy efficiency indicators in 2007-2014

Charts

Methodological explanation

Structure of energy balances in Azerbaijan (model)

Average conversion rate of ton oil equivalent (TOE) by different energy products for using in official statistics

Balance of fuel - energy in 1995 - 2006

E-version of publication

[About results of the survey on fuel and energy consumption in households in 2010](#) (225 KB)[Results of 2012 sample statistical survey on consumption and production of types of energy by private entrepreneurs \(natural\) entities](#) (393 KB)

Statistical collection "Energy of Azerbaijan" contains national energy balance, commodity balance of energy products

and other necessary information on energy statistics for 2010-2014 years. Collection consists of 5 sections: 1st section covers main indicators of energy enterprises' activities, energy consumption and share of electricity in energy consumption, energy capacity and etc., 2nd section – energy balance and distribution of balance by sectors, 3rd section - commodity balances of energy products, 4th section - consumption of energy products by types of economic activity, 5th section - output of crude oil and natural gas, power of electric stations, tables on air pollution by enterprises operated in different branches of economy and etc.

The current energy balance is based on requirements of "International Recommendations on Energy Statistics" that was prepared by International Energy Agency, Eurostat and other international organizations and 21 countries, including Oslo Group, where Azerbaijan is one of the members and adopted on February 2011 at the 42nd session of the UN Statistical Commission.

Brief methodological instructions on compilation of energy balance are included.

In order to facilitate finding of indicators and "conversion rate" the list of indicators in alphabetical order is included at the end of the collection.

In case of using statistics in publications and printing works, it is necessary to refer to the State Statistical Committee of the Republic of Azerbaijan.

Conventional signs:

« - » not applicable

« ... » data are missing (not present)

« 0.0 » negligible magnitude

Note:

In some cases insignificant difference between sum-totals is explained by rounding of figures.
