

Government of **Western Australia**
Department of **Mines and Petroleum**

Interactive geological map (GeoVIEW.WA)

GeoVIEW.WA is an interactive (GIS-based) mapping system. You can construct your own geological map and incorporate other mineral and petroleum exploration datasets including mines and mineral deposits, petroleum wells, active leases, and much more.

GeoVIEW.WA is an online GIS-based mapping tool that allows users to view, query, and map various geology, resources and related datasets. These integrated statewide data are regularly updated. Users can construct and print a customized geological map (by chosen area and scale) and incorporate other mineral and petroleum exploration datasets including mines and mineral deposits, petroleum wells, and active leases.

Once GeoVIEW.WA is open, click the 'What's New?' button to find out what the latest releases of data/layers and additions to GeoVIEW.WA are.

NOTE: GeoVIEW.WA will run in web browsers that support the Microsoft Silverlight plugin, these include Internet Explorer 8+, Firefox 3.5+ and Safari 3+, if Silverlight is not already installed it may take a few minutes to download and install this plugin.

GeoVIEW.WA will NOT run in Microsoft Edge and Google Chrome v45+, these web browsers do NOT support the Silverlight plugin.

Advanced search functionality

The 'Search Tools' tab in GeoVIEW.WA allows advanced searches for a variety of datasets, as listed below.

- **GSWA Catalogue** – Search the catalogue of all GSWA products associated with a geographic region in Western Australia, and view these products online
