Vision

To be the regional role model for a governing and regulatory body of the energy sector for its open competitiveness and environmental friendly approach.

Mission

The Ministry of Petroleum and Mining's mission is to manage and develop the petroleum and mining of South Sudan on behalf of its people, in a manner that:

- Contributes fully to economic prosperity and human development;
- Is ethical, efficient, transparent and accountable and according to environmentally, socially and economically sound practices;
- Allows the people of South Sudan to benefit equitably from the revenues derived from petroleum and mining;
- Requires the oil and mining industries to train and employ South Sudanese in their activities;
- Maximizes the value of petroleum and mining resources and converts it into lasting benefits for the people of South Sudan;
- Uses best international practices and technology in petroleum and mining activities to eliminate environmental degradation;
- Provides for an adequate domestic supply of petroleum to serve the needs of the people of South Sudan;
- Promotes fair compensation to increase productivity and efficiency in the petroleum and mining sectors.

Organizational Structure
