Data bases

The NIS proposes several databases:

- [The Integrated Management Information System \(IMIS\)](#) : permits to proceed to online processing. Therefore, to have directly access to pre-defined indicators or to calculate his/her own indicators. These indicators can be disintegrated according to the desired characteristics and produced on thematic maps.
- [National Archives for Data \(ANADOC\)](#): permits to have access to data and meta-data of surveys, studies and censuses possessed by NIS.
- [The Cameroon Data portal](#) : Online access to various data, informations and publications.
- [Cameroon Socio Economic Database \(CamSED\)](#) : Provide access to socioeconomic indicators, particularly on MDG and national policies.
