NATIONAL AUDIT CHAMBER (NAC)

Functions

The Audit Chamber was established according to the Interim Constitution of South Sudan Section 195. The Audit Chamber Provisional order was signed by the President on January 17, 2011. It will soon be enacted by parliament and disseminated to various Government Institutions and other interested parties.

The mandate of the Audit Chamber is to audit and supervise Government departments and agencies including ministries, commissions, legislative assemblies, and universities. The mandate covers all of South Sudan at the national, state, and county level.

The Chamber is currently focussing on three main priorities. The first is capacity building which has seen professional staff doubled from 15 in the second half of 2010. This number is expected to reach 130 by the end of 2011. Most of the young staff have been trained in Arabic, extensive training is ongoing. The Chamber also intends to tap into the diaspora for experience.

The second area is physical infrastructure. The Chamber has already received \$2.9m by the Government of South Sudan. The World Bank will match this amount to build an office at the Ministry of Finance.

The third area is the budget which rose last year from the budgeted 15m in the supplementary budget of 2010. The organisation's financial management system is currently being formulated.

The South Sudan Audit Chamber performs the following functions and

1. Audit (performance and financial) of GOSS and States financial reports
2. Supervision, auditing and reporting in GOSS levels of government
