Tenders and auctions

The right to subsoil use may be granted on the basis of tenders, auctions and by direct negotiations.

Granting subsoil use rights on the objects of mineral deposits of national importance is carried out on results of competitions. The list of objects of mineral deposits of national importance are established by the Government of the Kyrgyz Republic on recommendation of the Госгеоагентства. Competition for each object of mineral deposits of national importance is held by the decision of the Government of the Kyrgyz Republic interdepartmental tender Commission in accordance with the regulations approved by the Government of the Kyrgyz Republic.

On the conducted competitions license to use the subsoil is issued on the basis of the Protocol of tender Commission.

Granting subsoil use rights on the basis of auctions are:

- On objects, the list of which shall be approved by the authorized state body implementing the state policy on subsoil use;
- On objects of national importance, which identified the winners according to the results of competitions;
- On objects not included in the list of deposits offered for auction, but that received two or more requests.

According to the conducted auctions license to use the subsoil is issued on the basis of the Protocol of the auction Commission.
