

Who we are

Saudi Aramco is the state-owned oil company of the Kingdom of Saudi Arabia and a fully integrated, global petroleum and chemicals enterprise.

Over the past 80 years we have become a world leader in hydrocarbons exploration, production, refining, distribution and marketing.

Saudi Aramco's oil and gas production infrastructure leads the industry in scale of production, operational reliability, and technical advances. Our plants and the people who run them make us the world's largest crude oil exporter, producing roughly one in every eight barrels of the world's oil supply.

Energy is opportunity

Saudi Aramco safely and sustainably delivers the energy that makes new opportunities possible.

We manage proven conventional crude oil and condensate reserves of 261.1 billion barrels. Our average daily crude production is 10.2 million barrels per day (bpd), and we have stewardship of natural gas reserves of 297.6 trillion standard cubic feet (scf).

Headquartered in Dhahran, Saudi Arabia, with offices and operations throughout the Kingdom, we employ more than 65,000 workers worldwide.

Our subsidiaries and affiliates are located across the globe in Saudi Arabia, China, Egypt, Japan, India, the Netherlands, the Republic of Korea, Singapore, the United Kingdom and the United States.

Today, we continue to deliver on our core mission of reliably supplying energy to the Kingdom and the world, and continue to progress towards becoming the world's leading integrated energy and chemicals enterprise, a top refiner and a creator of energy technologies.

The men and women of Saudi Aramco are firmly dedicated to the resolution that energy is opportunity - a promise we are proud to honor to our customers, partners, and stakeholders every day.
