

Dubai Supreme Council of Energy

His Highness Sheikh Khalifa bin Zayed Al Nahyan

President of the United Arab Emirates

The UAE is striving to develop and boost its rich resources and expertise in the international energy markets and enhance its leading role as a world centre for renewable energy research and development".

His Highness Sheikh Mohammed bin Rashid Al Maktoum

Vice President and Prime Minister of the United Arab Emirates and Ruler of Dubai

"We recognize that preserving our energy resources will be one of the greatest challenges in our drive towards sustainable development. This, however, will not materialize unless the different facets of our society adopt energy conservation principles in their core values. The future generations will be the chief beneficiary of our achievements and the best judge of what we accomplish in this field."

The Dubai Supreme Council of Energy (DSCE) was formed in August 2009 under Law 19 of 2009, issued by His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE, and Ruler of Dubai. His Highness Sheikh Ahmed bin Saeed Al Maktoum was appointed as Chairman for the Council and His Excellency Saeed Mohammed Al Tayer, as Vice Chairman. The Council consists of the following members: the Director General of the Department of Petroleum Affairs, the President & Chief Executive Officer of Dubai Aluminium Company (DUBAL), the Chief Executive Officer of Emirates National Oil Company (ENOC) and one representative each from the Dubai Supply Authority (DUSUP), Dubai Petroleum Establishment (DPE), Dubai Municipality (DM), Dubai Nuclear Energy Committee (DNEC) and Roads & Transportation Authority (RTA). The Council has a Secretary General and an Advisory Committee from competent and specialized workforce. The new Governing body seeks to ensure that the Emirate's growing economy will have sustainable energy while preserving the environment. The Authority is developing alternative and renewable energy sources for the Emirate, while increasing energy efficiency to reduce demand.
