

Alberta Conventional Oil Statistics

2014 Statistics (unless otherwise stated)

Initial volume in-place	81.3 billion barrels
Remaining established reserves	1.8 billion barrels
Remaining ultimate potential	19.7 billion barrels
Successful oil wells drilled	2,808 wells
Wells drilled (all types)	4,668 wells
Production	591,260 barrels per day
2014/2015 Royalties	\$2.2 billion
Investment (upstream conventional oil and gas)	\$27 billion (2013)

3,751,718 = average barrels of Canadian crude (including bitumen) produced daily in 2014 according to the National Energy Board (NEB). Of this, approximately 20 per cent is from conventional crude oil.

Canada is the highest ranked as supplier of imported crude oil and refined products to the United States.

2014 U.S. Sources of Crude Oil and Refined Product Imports - Thousand barrels per day (United States Department of Energy - [Energy Information Administration](#)).

- Canada – 3,388
- Saudi Arabia – 1,166
- Mexico – 842
- Venezuela – 789
- Iraq - 364
- Russia - 327
- Angola - 151
- Algeria – 109
- Nigeria – 92
- Norway - 45
