Recirculation Pump Kit (Timer Based):

Stop waiting for water to heat up and watching money go down the drain. The *NEW* Recirculation Pump Kit from Rheem provides immediate hot water using the Tankless water heater controls. A timer setting can be activated to run every so often (for example, every 30 minutes) to keep hot water flowing through the homes pipes and ready when needed.

Built-in functionality on the water heater for two different modes of operation allows the comfort of the Performance mode or save on energy costs using the Energy Saver mode. Installation has also been made easier with an internal check valve built into the pump, no external plug to fix into a wall outlet, and no need to install an aqua stat.

Recirculation Timer Cycles

| WATER HEATER THERMOSTAT SET TEMPERATURE °F | TYPICAL PUMP ON INTERVALS (MINUTES) | |
|--|-------------------------------------|----------------------|
| | PERFORMANCE MODE | ENERGY SAVER MODE |
| 140 | 15 | 30 |
| 135 | 15 | 30 |
| 130 | 15 | 30 |
| 125 | 15 | 30 |
| 120 | 16 | 31 |
| 118 | 17 | 33 |
| 116 | 18 | 35 |
| 114 | 19 | 38 |
| 112 | 20 | 40 |
| 110 | 22 | 44 |
| 108 | 24 | 47 |
| 106 | 26 | 51 |
| 104 | 28 | 56 |
| 102 | 31 | 63 |
| 100 | 35 | 69 |
