

2020 Inpatient Pediatric Rehabilitation overview

Total patients
in 2020: **113**

Outcome data for top four diagnoses

Non-traumatic brain dysfunction:

- Number of persons served: 35
- Average number of hours of treatment per day: 3.33 hours
- WeeFIM gain (Effectiveness): 29.7
- Disposition at discharge: 33 patients discharged to home
- Unplanned transfers to acute medical facilities: 2 patients

Experience of service/patient feedback:

"This is a great rehab unit with incredible people who take such great care of the children like their own."

Major multiple trauma:

- Number of persons served: 18
- Average number of hours of treatment per day: 3.25 hours
- WeeFIM gain (Effectiveness): 27.2
- Disposition at discharge: 18 patients discharged to home
- Unplanned transfers to acute medical facilities: 0 patients

Experience of service/patient feedback:

"It's a tight schedule here, but it really impressed me the way the therapists work with them according to their interests. OT and PT worked together so great. I have to give kudos to this group here at Riley. They are top-notch."

Traumatic brain dysfunction:

- Number of persons served: 12
- Average number of hours of treatment per day: 3.5 hours
- WeeFIM gain (Effectiveness): 19.7
- Disposition at discharge: 11 patients discharged to home
- Unplanned transfers to acute medical facilities: 1 patient

Experience of service/patient feedback:

"They are there to help you learn your new normal, to help you realize this is not the end of your life, this is something different and new. They treated us not like a number on the chart. They treated my son like a family member."

Debility:

- Number of persons served: 10
- Average number of hours of treatment per day: 3 hours
- WeeFIM gain (Effectiveness): 23.3
- Disposition at discharge: 9 patients discharged to home
- Unplanned transfers to acute medical facilities: 1 patient

Experience of service/patient feedback:

"They spend the extra time with Kayla. That's their spirit, and it's beautiful."
