Objective: To accurately, reliably, and diligently focus on the timely, quality completion of all lab procedures. Work well under pressure and time constraints within high-volume environments.

EDUCATION

Georgia State University, Atlanta, GA May 9, 2017
Bachelor's of Arts and Science, Neuroscience

Clayton State University, Morrow, GA August 2012 - December 2015
Biology, pre-med

EXPERIENCE

Research Lab Intern, Georgia State University January 2017 - May 2017
Dr. Mukesh Dhamala, Neurophysics and Neuroimaging

- Localizing the Origins of Epileptic Seizures in Human Patients
- Granger causality analysis of high frequency intracranial EEG activity
- Apply Granger causality to preictal infraslow EEG, compare results
- iEEG data analysis, interpretation/presentation, writing of results.
- Research papers and design powerpoint presentations

Neurobiology Lab

Dr. Michael Paul Black, Neuroscience Fall 2016

- Experiment design and testing
 - Observed crayfish behavior and analyzed using different methods:
 - Electrophysiology
 - Western Blot
 - Immunocytochemistry
 - Gel electrophoresis
 - PCR Polymerase (chain reaction)
 - Analyzed using statistics
 - Presentation
-

INTERESTS

Physical Sciences, community leadership and advocacy.
