REFERRALS/RECOMMENDATIONS

JACKIE HORTON (ACADEMIC ADVISOR, INTRO/INTERMEDIATE PROGRAMMING PROFESSOR)

“His approach to his plan for his education, both undergraduate and graduate, are again well-thought out and systematically implemented. He has clear goals in mind of how he’d like to use his computer science education and it’s evident in his course and work within those courses.”

JOAN ROSEBUSH (CALCULUS PROFESSOR)

“He knew when he knew the material well enough to take the lead on group work; he also knew when someone else better-suited the leadership role.

His communication skills are excellent, both in writing and in speaking. He is a great listener, too! He also knew when to crack jokes in class and when to be quiet. This is a skill that he has in his “toolkit.””

ENTHUSIAM/PASSION/VALUES

I completely admire and respect a company whose work ethics are mirrored to those I found in the military. In the Army we learned that doing the right thing wasn’t a part-time job. Having the strength and the courage to do the right thing when no one else is looking is what we called integrity. Honor, personal courage, duty, loyalty. These are the traits I both offer and look for in an employer. I am confident my skills and values would be an asset to the company. It would be an honor to have to opportunity to join and be a part of your team.
