

## 2 Year Goals:

By April 21, 2022 my goal is to have been working for one year on an intensive care unit at Arnot Ogden Medical Center in Elmira, NY because I have an interest in caring for critically ill patients and want to provide the best care for them by gaining experience.

By April 21, 2022 my goal is to improve on my skills that I learned in nursing school and gain additional knowledge on critical care patients through certifications and training available through Arnot Ogden Medical Center.

By April 21, 2022 my goal is to prepare to explore options for a master's degree in Nursing, by taking on shadowing positions in different fields in order to determine my interest.

## 5 Year Goals:

By April 21, 2025 my goal is to have four years of experience in intensive care through working as a registered nurse on Arnot Ogden Medical Center's intensive care unit. This experience will give me confidence in this field so that I am comfortable and confident in caring for critically ill patients.

By April 21, 2025 my goal is to be enrolled into a master's program and would be possible due to my dedication in achieving a high-grade point average in my undergraduate education through Elmira College. I believe the more education I have, the better nurse I will become and want to continue up the ladder of success.

By April 21 2025 my goal is to have taken on additional shifts on other floors to broaden my skills and knowledge so that I am valuable as a care provider because the more experience I gain, the better nurse I will be and the better care I will be able to give to my patients.
