Ms. Wendy Coster

Professor and Chair, Department of Occupational Therapy

Boston University

233 Bay State Road

Boston, MA 02215

Dear Ms. Coster,

I am very interested to have the opportunity to be part of your occupational graduate program at your university. As being a double major in biology and psychology, I have taken classes that involve interpersonal skills with others, understanding others, and understanding all aspects of the human anatomy. This information has helped me create a passion for this field. With that being said, occupational therapy is a field that I would be honored to be a part of, and I believe that your university will give me the best opportunity to hone my skills.

Helping others has always been something I've wanted to do in my life. If there is ever an opportunity to help someone in any way, I always take it. I am currently planning on interning at a local care facility in order to get hands on experience. However, working as a gold key at Elmira has given me the chance to work with students who are unsure about their decision on college. Furthermore, every year I work at a baseball summer camp from ages 5-18 to teach them the aspects about the game. Even though these two jobs are unrelated to the occupational therapy field, they still have impacted me on a large scale. Both have helped create interpersonal skills and ways to interact with people no matter the age.

I would love to meet with you in order to discuss about how I would fit into your graduate program. Thank you for your time and consideration.

Joseph Morrone
