

2 Year Goals:

By April 2022, I will be working on the medical surgical unit at Mount Sinai Hospital in NYC so that I may establish a good backbone/foundation for the remainder of my nursing career at a strong hospital. I also plan to be living on my own in an apartment I have bought for myself in Queens, New York. I also plan to be working on my certifications so that I may work as an Operating Room Nurse.

5 Year Goals:

By April 2025, I will be working toward earning my Nurse Practitioners license while being sponsored by the hospital I am employed at. I also plan on obtaining a Registered Nurse First Assistant (RNFA) certification to be able to function as a first assist in the operating room. I will also be investing in purchasing a home to begin to settle down and start a family.
