WORK/LEADERSHIP EXPERIENCE

COMPUTATIONAL MEDIA (CM) MENTOR

Georgia Tech College of Computing | Atlanta, GA | August 2019 - Present

- Serve as a teaching assistant for CS 1100 (Freshman Leap Seminar) by being present in class each week and grading assignments
- Communicate with incoming CM students during summer and fall through social media and email, providing advice and answering questions from first-years
- Participate in at least one social event each month during fall semester, encouraging students to attend level-ups and socials hosted by CM Ambassadors

STUDENT ASSISTANT, FRONT-END WEB DEVELOPMENT/DESIGN INTERN

Georgia Tech College of Computing | Atlanta, GA | May 2019 - Present

- Maintain and enhance content within Computational Media (CM) website (<https://cm.lmc.gatech.edu>)
- Create flyers, publish and distribute electronic newsletters
- Aid other student assistants and advisors in helping students get advising

SOFTWARE DEVELOPMENT & DESIGN INTERN

NASA Ames Research Center | Mountain View, CA | May 2019 - August 2019

- Design and implement pages for NASA HUNCH website
- Integrate WordPress content management system into NASA HUNCH with PHP
- Implement new features into existing software code base for scheduling and planning tool to be used in space, following requirements given by UX designers
- Conduct quality assurance testing for the scheduling and planning tool

PRESIDENT

Computational Media (CM) Ambassadors | Atlanta, GA | October 2018 - Present

- Lead weekly meetings to discuss ideas for Level-Up sessions and ways to foster interaction among CM community as a whole
- Manage Facebook page, create flyers, and organize monthly study socials and company events as well as Fall CM Showcase and Spring CM Talent Show

PROJECTS

PERSONAL WEBSITE

<https://fernanda-moreno.github.io/>

- Utilize HTML and CSS in crafting personal website which displays portfolio in coding, design, videography, and photography
- Consistently update web design and content as new projects arise

TWITTERBOT WITH JAVASCRIPT

<https://github.gatech.edu/fmoreno6/Twitter-Bot>

- Utilized Node.js to create a humorous Twitterbot that tweets Georgia Tech-related images and memes in a satirically poetic form
