- Place within the top 1% of Village Green Virtual Charter School Class of 2020 and top 5% of Pilgrim High School Class of 2020.

VOLUNTEER AND COMMUNITY WORK

- Herreshoff Marine Museum 300+ hours: I volunteered for the 2018 summer at Herreshoff as a Junior Instructor. The position of a Junior Instructor allows you to develop character while working alongside students. I was able to help develop connections and work with diverse personalities while teaching each student about the beautiful sport of sailing. Throughout this experience I worked with students from low-income backgrounds who attended the camp through scholarships and partnerships, this allowed me to understand each student on a personal level because I was given the same opportunity.
- Warwick Public Library 20+ hours: I volunteered for the 2017 Summer at the Warwick Public Library for their annual youth reading event. This volunteer work allowed me to get students of younger generations excited and interested in the world of reading. Throughout the process of my volunteer work I was able to talk to young students about their passions and how reading has enlightened them and allowed them to grow as students.
- Creator of Warm a Neighbor Non-Profit: During my Junior year I realized the large problem many homeless individuals find themselves in during the winter season and that is being cold. Although, I am not wealthy I decided to set-up a non-profit organization within my high school where we were able to take donations of hats, gloves, and scarves for people who were unable to afford such. Then taking donations I made sets and placed them into biodegradable bags where I left them around the city of providence and handed them out to people in need. This experience allowed me to give back to the community before departing for college.
