## Objective

To have a career in audio visual engineering.

To attend Champlain College in Vermont after I graduate HVCC.

---

## Summary

1. I am currently a senior at ICC High School, but I am participating in the Early Admissions program through HVCC. I took two independent studies in technology in my junior year, and I have high grades in honors science and other honors courses. I am currently trying to teach myself ASL, and I was able to get a course started up at the Kinderhook library that started in April, 2019. It took place once a week for six weeks, and they were planning to hold another class this year. -----  
----- I started up a small business called Trick for Treat making and selling dog treats when I was 11, but switched over to dog collars and leashes by the time I was 12. I have been making and selling them ever since and just recently started making bandannas for dogs as well. I've also made multiple donations to Everlasting Hope Animal Rescue with the collars. I have made a few sales with an Etsy site I've had up since I first started, but I make most sales at craft fairs and from people telling their friends. I have participated in multiple different craft fairs around the area including one at my school in the winter, one at Callendar's nursery, several at the Chatham Berry Farm, Kinderhook's Candlelight night two years in a row, the community fair July of 2019 at Barnwell, and several of Kinderhook's farmer's markets.
