LEADERSHIP

Programming Club at GSU

February 2021 - Current

President

- Was appointed to an Executive officer position through contributing to large projects and interacting with the community.
- As President, I organize, advertise, and oversee the implementation of events as well as help with other executive club functions such as recruitment and idea curation.

Computer Science Principles 1301 & 1302 Admin

Discord Admin / Study Lead / Tutor

- Displayed proficiency not only in coding (Java) but also in discussing concepts and teaching large groups of students (90+) in a variety of ways to further understanding and build community.
- Organized and led study sessions containing entire classes to address questions and concerns as well as help with the debugging of personal and class projects.
- Engaged with the community through polls, live streams, and announcements to keep classmates up to date as well as to foster community between individuals.

NOTABLE PROJECTS

Adventure Game

April 2021

Written in Java

- Worked as a team with several other Programming Club executive officers to create an adventure game for use in an event displaying the power of object-oriented programming.
- Designed locations, characters, all dialogue, all descriptions, and any other text displayed in the game.
- Helped project reach its goals by testing and providing feedback to lead developers.

Creature Site

Jan 2023

Written with HTML, CSS & JavaScript

- Designed web page layout, coded the website skeleton, and created assets for the website.
- Created a baking game for users to play, level-up, and obtain currency to be associated with their account.
- Created a Mancala AI for users to play against
