EXPERIENCE

Microsoft — *Software Engineer*

JUNE 2016 - PRESENT

- Modernization of agreements for OEM partners by building a web application using AngularJS and ASP.Net Core, clearing way for the retirement of a legacy application, which resulted in elimination of 88% contract templates, \$300K YOY reduction in manual support cost for BPO processing and support for agreement renewal cycle, \$72K YOY reduction in infrastructure and reducing E2E Agreement cycle time from 11 days to < 1 day.
- Core member of the Digital Attach program for PC, which enabled OEM partners to attach digital game-passes, first-party or third-party games from the Microsoft Store with their Windows devices for the end customers.
- Modernized multiple applications using React to provide a better User Experience to customers and remain compliant with the industry standards as the legacy applications were built on Silverlight, which is reaching end of support in 2021.

HCL Technologies — *Summer Intern*

MAY 2014 - JUNE 2014

Developed a web invoicing tool for a multinational logistics company. This gave the customers the ability to view, accept or reject their invoices online in case of any discrepancies.

EDUCATION

Georgia Institute of Technology — *MS, Computer Science*

JAN 2018 - DECEMBER 2020

GPA: 3.7/4

Manipal Institute of Technology — *B. Tech, Computer Science*

AUG 2012 - APR 2016
