Terrence Jones

Objective Pursuing a degree in Computer Engineering, with a passion for technological developments. Seeking to join a reputable company and gain knowledge about software development/testing, and additional aspects of the technology industry.

Experience 5/2022 - 8/2022 Tyonek Native Corporation/
Tyonek Manufacturing Group Warner Robins, GA

Summer Software Engineering Tech I - Internship

- Through length of internship, used Printed Circuit Board software such as OrCAD to fully design a circuit board that will be used on military testing equipment.
- Learned and implemented Python to write scripts that automated tasks such as data entry, that otherwise would be tedious work.
- Collaborated with engineers to test/debug code and hardware that is contracted from the U.S. military. This was done on the VDATS (Versatile Depot Automatic Test Station) station.
- Proof-read engineers' schematics, code, and other documentation for their specified project.

5/2021 - 8/2021 The Home Depot Warner Robins, GA

Lot Associate/Loader

- Helped keep the store looking neat by placing carts in designated place. Assisted customers with loading products into their vehicles. Including mulch, wood products, sinks, etc. Additionally, helped customers find necessary products.

3/2020 - 8/2020 AAA Pool Supply Inc. Warner Robins, GA

Store Associate/Chlorine boy

- Filled chlorine jugs to prepare for the customers and loaded jugs into customers vehicle. Also helped customers to find the right pool part/chemicals they needed based off the issues they were having.
- Answered calls from customers answering their questions on pool quotes, what pool parts they may need and if we have them in stock and completed over the phone order placement.

5/2018 – 4/2020 Uncle Maddio's Pizza Joint Warner Robins, GA

Crew Member

- Greeted every customer that came into the restaurant, answering their questions about our menu, then created the pizza/or calzone as the customer stated and gave them suggestions to other products.
 - Created the pizza/or calzone as the customer stated and gave them suggestions to other products. Also rang the customer up when store wasn't busy.
 - Worked with team members to prep products for the day, stretched dough, and assisted in Opening/closing of the store.
 - Trained new team members on every aspect of the kitchen including how to make/stretch dough, prep products, use the register, answer phone calls, and all safety precautions needed in the kitchen.
-

Education August 2020 -
expected 2024 Georgia Southern University Statesboro, GA

BS in Computer Engineering

- Current GPA: 3.78 (on a scale of 4.0)
 - Learned languages: C, C++, MATLAB, JAVA, and Python
 - Important courses: Physics 1 & 2, Logic Circuit Design, Digital Design, Data Structures, Circuit Analysis 1& 2, and Signal Processing
-

- Skills**
- Experience using OrCAD Captue/Layout and PCB routing software
 - Python graphic user interface functions
 - Use of Azure DevOps
-
