Professional Summary

Dynamic Marine Corps veteran and Security Professional with extensive experience in cybersecurity, risk management, compliance, and security program oversight. Proven ability to identify vulnerabilities, protect classified information, and ensure compliance with government and industry regulations. Successfully led a security program that earned a Superior rating from the Defense Counterintelligence and Security Agency (DCSA) for three consecutive years, demonstrating expertise in security risk assessments, compliance audits, and regulatory enforcement. Adept at implementing federal security regulations to strengthen organizational security posture. Recognized for strategic leadership, and fostering collaboration between government and industry stakeholders.

Professional Experience

IBM - Facility Security Officer (FSO)

June 2022 – Present

- Managed the oversight of 24/7 security operations, holding roles as the Account Manager, Security Administration Manager, and Personnel Security Records Manager.
- Led the project management process for establishing an SSA (Special Security Agreement) with DCSA.
- Conducted self-inspections, security training, and compliance audits to enhance the overall security posture.
- Authored and updated critical security documentation, including emergency action plans and facility policies.
- Coordinated with federal agencies and government officials to ensure adherence to federal regulations and directives.
- Oversaw and accredited two secure rooms under DCSA-147, maintaining a Superior rating from DCSA for three consecutive years.
- Processed and managed Prime and Sub DD254s, ensuring compliance with contract security requirements.

IBM - Security Consultant

December 2020 – June 2022

- Performed 24/7 security surveillance of sensitive digital and physical deliverables, ensuring adherence to data security policies and operational procedures in a SOC-like environment.
- Monitored security systems, access controls, and real-time threat intelligence, identifying and escalating potential security incidents, data breaches, and insider threats for further investigation.
- Applied Data Security & Privacy (DS&P) measures to safeguard proprietary information, intellectual property, and high-value business assets from unauthorized access and data loss.
- Conducted security risk assessments on potential security events, assisting in the implementation of preventative security measures.
- Supported compliance efforts by ensuring security controls aligned with NIST 800-53, ISO 27001, GDPR, and HIPAA standards.
