Am I a person passionate about my profession and communication. I am a full time student of Computer Science, with a 3.8 GPA. I also study Japanese. I have been involved on every level business more than 10 years. It requires creativity and personalization that reaches the core of the client to be effective in my job. It's important to be deeply aware of the motivating reasons behind the companies choices.

I have a proven track record in Strategic Partnerships, Efficient Practices and commitment to persevere when. In the past I employers have always count on me to complete the task independently. Recently I have been working on, a bachelors degree in Computer Science and am in my 3 year.

I am ready for the next step in my life. I am finishing a formal education online, and preparing for a woking role in Web development. This is an exciting time. I have done IT in the past and love coding.

I look forward to meeting you, and you are welcome to call or email if you need additional information.

Warmest regards  
Shane Flaten
