Meditation

EDUCATION

SNHU

01/2022-current

I am enrolled in SNHU for my B.A. in Human Services with a concentration of child and family services.

Infant Toddler CDA

06/21-08/21

I completed my infant-toddler CDA in a very quick manner to be able to attain my lead teacher credentials before The Learning Tree opened a new building. I used extreme detail in my portfolio and spent many hours dedicated to perfecting my work.

LRCC

08/2016 – 12/2017

I attended LRCC for my fire science associates degree. I finished the 2 year program within 1 year and ended with a 3.93 GPA. When I started college I was 16 and loved every bit of it. I achieved my fire certifications as well as my EMT Basic. My actual graduation was May of 2018.

NHTI

08/2018 - 08/2020

I completed 3 semesters of nursing school before realizing that it just was not the right profession for me to be in. Though, through this experience, I got to work on the pediatric floor and the special care nursery. These floors were my favorite throughout the nursing school curriculum.

2018 and 2019 were spent working on the prerequisites for nursing school and obtaining my Advanced EMT.

Home Visitor CDA

11/2022-current

I completed my home visitor CDA in a very quick manner. I used extreme detail in my portfolio and spent many hours dedicated to perfecting my work. I am ready to do an observation visit and am just waiting for Covid-19 restrictions to lift.

WORK EXPERIENCE

Owner of Healing on Manes

03/2021-current

I have started my own non-profit after months of planning. I work with my horse to help heal children's emotional traumas. I have worked hard to create a program that helps children grow emotionally to discover the best version of themselves that they often feel afraid to show. I have seen a growth in confidence, adaptability, gentleness, carefulness, and comfortability with the person they are. I plan to continue working with clients and growing my nonprofit to help as many children as I can.

Home Visitor- Early Head Start CAP-BM

10/2021-current

As a home visitor with Early Head Start, I have grown immensely. I have worked with a caseload of 10 families and provide educational and social services for them. I have become familiar with working with multiple local human resources agencies and have expanded my knowledge on infant-toddler education. I have been extremely self-motivated in this job and made many connections for public outreach as well as I have obtained my home visitor CDA.

Assistant Teacher- The Learning Tree

01/2021-10/2021

As an assistant teacher at The Learning Tree, I have grown immensely. I have worked alongside a lead teacher to care for 12-15 toddlers on a daily basis. I have grown from helping in the classroom, to now planning curriculum on my own. I often run circle time, along with constantly cleaning our classroom to keep it neat and organized. I have gained my CDA while working at The Learning Tree and am ready to keep expanding my knowledge.

NICU LNA

03/2020-03/2021

As an NICU LNA, I assist the nurses and doctors with anything and everything they need me to. We do vital signs, basic patient care including feeds, changings, and continuous monitoring of patients. We also restock all of the rooms, supply rooms, and nurses stations. As an NICU LNA, we are directly involved with patient care and are helpful as an extra set of hands. We also support the families whenever possible to make their experience less stressful. I chose to leave the NICU to focus on my nonprofit.

Pittsfield Fire and Rescue Firefighter/Advanced-EMT

10/2019-current

As a firefighter/ A-EMT, I function within a team atmosphere but also take care of critical patients on my own. We are the patient's sole care providers in the back of the ambulance. We respond to any and every emergency call that comes in. Each day, we are responsible for checking the ambulance and specific trucks. We do light chores around the station, paperwork, and are constantly interacting with the public for outreach and education programs. We are constantly doing training to keep up with all skills and learn new techniques. As an Advanced EMT, I start IVs, give specific medications, provided breathing therapies for my patients, and act as a senior member on calls.

Dunbarton Volunteer Fire Department Firefighter/EMT

09/2017-current

As a firefighter/ A-EMT, I function within a team atmosphere but also take care of critical patients on my own. We are the patient's sole care providers in the back of the ambulance. We respond to any and every emergency call as volunteers. We are responsible for checking the ambulance and specific trucks. We do light chores around the station, paperwork, and are constantly interacting with the public for outreach and education programs. We are constantly doing training to keep up with all skills and learn new techniques.
