

Dear Hiring Manager,

I am writing to express my interest in growing with your organization in a technology-focused role that allows me to apply my computer science knowledge before completing my degree. As an aspiring computer science graduate with practical experience in digital retail and AI projects, I am eager to contribute my technical skills to a forward-thinking company committed to innovation.

My current role as a Digital Air Traffic Controller at Walmart has honed my abilities in multitasking, problem-solving, and digital retail operations. In this position, I've demonstrated leadership capabilities by taking on responsibilities similar to those of a team lead, particularly in data analysis and schedule coordination. My additional experience as an AI Training Contributor has equipped me with valuable insights into AI development and cross-functional collaboration, skills that I'm excited to bring to your team.

What sets me apart is my unique combination of technical aptitude and exceptional organizational abilities. As a mother of three, I've developed unwavering determination and remarkable time management skills. I pride myself on my loyalty and commitment to growth—qualities that have enabled me to balance my academic pursuits with professional responsibilities while maintaining excellence in both areas.

My goal is to establish a long-term career where I can grow professionally while contributing innovative solutions to organizational challenges. I believe in joining a company before graduation to develop deep institutional knowledge and evolve alongside the organization.

I would welcome the opportunity to discuss how my technical skills, practical experience, and dedication can benefit your team. Thank you for considering my application.

Sincerely,

Kelly Reinersman
