Background:

Currently, I am a full-time honors student studying at Southern New Hampshire University for my Bachelors in Video Game Art and Development. I am pursuing this degree after clocking over 900 hours of experience working in a Visual Communications program as my vocational for high school. In the time I spent working in the program, I was able to explore many variations of art in different medias, applicable in numerous job settings. From practicing still life set ups and photography, to practicing digital art in Adobe Photoshop, Adobe Illustrator or Adobe InDesign, to learning some basic HTML coding; this class was an enriched educational experience into the world of art and the job possibilities associated within this field. I found myself specializing in art that was very meticulous and challenging, as I have a strive to push the limits of my capabilities at every available opportunity. During my time in this class, I was able to receive a certification in Adobe Illustrator in 2017 and travel to New York City to view some of their famous museums such as the Metropolitan Museum of Art as well as the Modern Museum of Art. While in high school, instead of opting for sports or instruments, I found myself driven

towards volunteer work. I volunteered several times at St. Albert the Great with my grandmother where I helped set up tables and chairs for graduation parties, birthdays, weddings or funerals on occasion or helped cook and prepare food on other occasions. There were times when I volunteered for their summer fair, running a game booth on my own. In addition, I would go with my cousin to help serve food to the homeless on Thanksgiving, and on several instances, I helped prep and cook meals for the Meals on Wheels program in North Olmsted, run by my aunt. Aside from art and volunteer work, I was also an honors student, taking AP English classes that served to perfect my essay building skills, along with honors math classes too. After my high school graduation in 2017, I took time away from my education to explore different jobs and experience life. I was then gifted with two beautiful and intelligent children that have inspired me in so many ways, one being to show them that success is possible and achievable through hard work, determination, and passion. I am enthralled in my education and success, for myself and my children as well. Organization, time management and adaptability have become second nature skills for me, both as a mother and in life. With the skills I have developed and the knowledge I have acquired, I am eager to apply my abilities to a job that will challenge me and push me to continue to learn and grow in my capabilities.

Education:

1. James E. Hanna Elementary – Parma, OH 44130 (2004-2010)
2. Greenbriar Elementary – Parma, OH 44130 (2010)
