

# WILLIAM WANG

## Profile

I am William, a computer science student from Taiwan currently pursuing my studies at GSU. From an early stage, I have developed a deep interest in design and coding. This passion has driven me to independently create several websites using HTML, CSS, and JavaScript. Furthermore, I have expanded my skills by crafting a snake game with Java and developing practical projects like a GPA calculator that involves arithmetic operations. These experiences have only served to fuel my enthusiasm for the field.

At present, my primary objective is to gain practical experience and broaden my skill set. I am actively seeking either a part-time job on campus or an internship opportunity to achieve this goal. While I have a particular interest in securing a position closely aligned with my major, I am also open to exploring new opportunities that can expand my horizons and enable further professional growth.

## Experience

I am currently employed as a math tutor at Georgia State University, as well as a Mandarin tutor off campus. Teaching has always been a passion of mine, and I find it fulfilling when I am able to help students grasp difficult concepts.

## Course Taken

- Data Structure (Grade: A+)
- System Level Programming (Grade: A+)
- Computer Org Programming (Grade: A)
- Web Design (Grade: A+)
